CU In some counties of England, especially in the west,
this word is pronounced as if written *cocumber*; this,
though rather nearer to the orthography than *cucumber*,
is yet faulty, in adopting the obtuse *u* heard in *bull*,
rather than the open *u* heard in *cucumis*, the Latin
word whence *cucumber* is derived: though, from the
adoption of the *h*, I should rather suppose we took it
from the French *concombre*. But however this may be,
it seems too firmly fixed in its sound of *cocumber* to
be altered, and must be classed with its irregular fellow
esculent *asparagus*, which see. *W*.

✂ This word, before Dr. Johnson's dictionary altered it, was, I believe, universally spelled with double *m*. Our ancestors were homed enough to think that, if we received a word from the Latin, and conformed to the quantity of that language, it was necessary to show that conformity by a specific orthography of our own. Thus, the first *u* in *cuminum* being short, they doubled the *m* to indicate that shortness; as the analogy of our language would infallibly pronounce the *u* long, if the consonant were single, in the same manner as in *cubick*, *Cupid*, &c.—See *DRAMA. W.*

♣ I have in this word differed from Mr. Sheridan and

Dr. Johnson, by placing the accent on the antepenultimate syllable instead of the penultimate. I know that Greek words of this termination have the accent on the penultimate syllable; but the antepenultimate accentuation is more agreeable to the genius of our tongue, and seems to have prevailed. For, though Dr. Johnson has given this word the penultimate accent, he has placed the accent on the antepenultimate syllable of *ambrosia*, *euthanasia*, and *hydrophobia*, though these have all the accent on the penultimate in the Greek. It is true the *i* in the last syllable but one of *cyclopædia*, is a diphthong in the original; and this will induce those, who are fond of showing their Greek learning, to lay the accent on the penultimate, as its opposition to general usage will be an additional reason with them for preferring it. The pronunciation I have adopted, I see, is supported by Dr. Kenrick, Entick, Scott, Perry, and Buchanan, which abundantly shows the general current of custom.

To these observations it may be added, that if the *i* be accented, it must necessarily have the long open sound, as in *elegiac*, and not the sound of *e*, as Mr. Sheridan has marked it. *W.*

DAMNED, dâmd, or dâm'-nêd. *part. a.* Hateful; detestable; abhorred. *Shakespeare*.

☞ This word, in familiar language, is scarcely ever used as an adjective, and pronounced in one syllable, but by the lowest, vulgar, and profane: in serious speaking it ought always, like *curst*, to be pronounced in two, 362. Thus in *Shakespeare*:

"But oh what damned minutes tells he o'er,
"Who doats, yet doubts—suspects, yet strongly loves."

There is a very singular usage of this word, as a verb or participle, when it signifies the condemnation of a play; but this application of it, though authorized by the poetical speakers, has an unhalloved harshness in it to pious ears, and an affectation of force to judicious ones. It is, at least, the figure called *catachresis*. *W.*

✚ If I am not mistaken, there is a prevailing pronunciation of this word in Ireland, which makes it a perfect rhyme to *far, bar, &c.* That this is contrary to universal usage in England, and to the most general rule in the language, needs not to be insisted on. The only word of a similar form which is so pronounced is the first person plural of the verb to *be*. But this, it must be remembered, is an auxiliary verb; and the auxiliary verbs, being as irregular in their pronunciation as in their form, are but indifferent models by which to regulate the rest of the language. *W.*

✂ An uneducated English speaker is very apt to pronounce this word with the accent on the first syllable, according to the analogy of his own language; but a learned ear would be as much shocked at such a departure from classical propriety, as in the words *sonorous* and *canorous*. 512. When once the mere English scholar is set right in this word, he will be sure to pronounce *dedecorous* with the accent on the penultimate likewise; and when he is told that this is wrong, because that syllable in the Latin word is short, he will not fail to pronounce *indecorous* with the antepenultimate accent; but what will be his surprise, when he is informed that this too is wrong, because the penultimate syllable in Latin is long!—See *INDECOROUS*. *W.* [Accented *decorous* also by *Entick*, *Sheridan*, *Jones* and *Webster*; *decorous* by *Ash* and *Perry*.]

☞ All our lexicographers, except Dr. Johnson, place the accent on the second syllable of this word; and this accentuation, it must be confessed, is agreeable to the best usage. But Dr. Johnson's accentuation on the last syllable is unquestionably the most agreeable to English analogy: first, because it is a trisyllable and a simple, 503: next, because it is derived from the latter Latin *decretalis*; which, in our pronunciation of it, has an accent on the first and third syllables; and therefore, when adopted into our language, by dropping the last syllable, takes the accent on the first.—See **ACAD-EMY**. That this is the general analogy of accenting words from the Latin, which drop the last syllable, is evident from the words *decrement*, *increment*, *interval*, &c. *W.*

DEFILE, dè-fîlè'. *n. s.* A narrow passage; a long narrow pass. *Addison*.

Some military coxcombs have endeavoured to intro-

duce the French pronunciation of this word *défilé*, as if written *deff-fe lay*; others have endeavoured to bring it nearer to our own analogy, by pronouncing it in three syllables, as if written *deff-fe-le*. I am sorry to find Mr. Sheridan has adopted this pronunciation: he is followed only by Bailey and Ash; the first of whom has it both ways, and the last gives it only as an uncommon pronunciation. Dr. Johnson and the rest are decidedly for the general pronunciation, which is the same as the verb to *defile*: and if this were urged as a reason to alter the pronunciation of the substantive, it may be answered, that the remedy would be worse than the disease.—See **BOWL**.

To these observations it may be added, that, if we pronounce this word exactly like the French, because it is a military term, we ought to pronounce a *file* of musketeers, a *feel* of musketeers. *W*.

TO DENIGRATE §, dèn'-è-grá-tè, or dè-ní'-grá-tè. *v. a.* [denigro, Lat.] To blacken. *Brown.*
 § All our lexicographers, except Dr. Johnson, accent this word on the second syllable. Placing the accent on the first is undoubtedly conformable to a very prevailing analogy of our language. 503. But all words derived from Latin words, retaining the same number of syllables, seem to retain the accent of their original. 503. (c.) Thus, to *denigrate* has the accent on the í because that letter is long, and has the accent in *denigro*; and to *emigrate* has the accent on the first syllable, because in *emigro* the same letter is short, and the accent is on the antepenultimate.—See *ARIETATE* and *COACERVATE*.
 In a former edition of this [Walker's] dictionary I followed the general voice of all our orthoepists, except Dr. Johnson, without recollecting that the í in the Latin *denigro* might be pronounced either long or short, and that, when this is the case, we generally adopt the short sound in words derived from that language: and as this short sound is more agreeable to the analogy of our own language, Dr. Johnson's accentuation seems to be preferable. 503, 545. *W.*

There is a general rule in pronunciation, viz. when a vowel ends a syllable immediately before the accent, that vowel has a tendency to lengthen, and is often, particularly in solemn speaking, pronounced as open as if the accent were on it.—See *To COLLECT*, 541.—This general tendency inclines us to divide words in such a manner as to make the vowel end the unaccented syllable: and, if the two succeeding consonants are combinable, to carry them both to that syllable which has the accent. When the *e* is thus left to finish the syllable before the accent in *de-spair*, *de-spach*, &c., it inclines to its open, slender sound, which, being rapidly pronounced, falls into the short *i*, which is exactly its short sound, 105, 107; for, when the *e* is short by being closed by a consonant, like other vowels, it goes into a different sound from the long one, 544. Thus the word *dispatch*, till Dr. Johnson corrected it, was always written with an *i*; and, now it is corrected, we do not find the least difference in the pronunciation. *W*.

DIA'STYLE, dl-âs-tle. *n. s.* [διά and στυλος.] A sort of edifice where the pillars stand at such a distance from one another, that three diameters of their thickness are allowed for intercolumniation. *Harris.*

§ The reason why this word is pronounced in three syllables, and *diastole* in four, is, that the latter is perfect Greek, *διάστολή*, and the former is a compound of our own, formed from *διά* and *στυλος*, a pillar. The same reason holds good for pronouncing *apocope*, as divided into *a-poc-o-pe*; and *osteo-scope* into *os-te-o-scope*. And though Johnson, Ash, Buchanan, and Barclay, accent *diastyle* on the second syllable, I have no hesitation to differ from them by placing the accent on the first.—See *ACADEMY. W.*

DIRUPTION §, dî-rûp'-shûn. 125. *n. s.* [*diruptio*, Lat.] Bursting or breaking.

DIS, dîs, or dîz. 425, 435. An inseparable particle, implying commonly a private or negative signification: as, to *arm*, to *disarm*; to *join*, to *disjoin*.

☞ When the accent, either primary or secondary, is on this inseparable preposition, the *s* is always sharp and hissing, 41; but when the accent is on the second syllable, the *s* will be either hissing or buzzing, according to the nature of the consecutive letter. That is, if a sharp mute, as, *p, t, &c.* succeed, the preceding *s* must be pronounced sharp and hissing, as *dispose, distaste, &c.*; but if a flat mute, as, *b, d, &c.*, or a vowel or a liquid begin the next syllable, the foregoing *s* must be sounded like *z*, as *disburse, disdain, &c.*; but if the secondary accent be on this inseparable preposition, 523, as in *disbelief, &c.*, the *s* retains its pure hissing sound. *Dismal*, which seems to be an objection to the first part of this rule, is in reality a confirmation of it; for the first syllable in this word is not a preposition, but a contraction of the Latin word *dies*; and *dismal* is evidently derived from *dies malus*. For want of this clue, Mr. Sheridan has given the *s* pure to *disgrace, disguise, &c. W.*

DISCRETE, dis-krête'. *a.* Distinct; disjointed. *Hale*. Disjunctive. *Milton*.—*Discrete proportion* is when the ratio between two pairs of numbers or quantities is the same; but there is not the same proportion between all the four: thus, 6 : 2 :: 3 : 4. *Harris*.

§ This word and its companion *concrete*, one would have supposed, should have the same accentuation in all our pronouncing dictionaries; and yet scarcely any two words are more differently accented. The accent is placed on the last syllable of *concrete* by Dr. Ash, Buchanan, Perry, Entick, and Bailey; and on the first by Sheridan, Dr. Johnson, Smith, W. Johnston, and Dr. Kenrick. Scott accents the last syllable of *concrete* when an adjective, and the first when a substantive: a distinction very agreeable to analogy, 494; but Entick, directly contrary to this analogy, reverses this order. *Discrete* is always used as an adjective, but has scarcely less diversity of accentuation than *concrete*. Dr. Johnson, Dr. Kenrick, Mr. Nares, Mr. Scott, Perry, and Entick, accent it on the last syllable; and Dr. Ash, Mr. Sheridan, and Bailey on the first. When I wrote the *Rhyming Dictionary*, I accented both these words on the first syllable; but this accentuation, I imagine, arose from contrasting them, which often places the accent on the opposing parts, as in *internal*, and *external*; but, upon maturer consideration, I apprehend the accent ought to be placed on the first syllable of *concrete*, when a substantive, and on the last when an adjective. *W*.

Dr. Johnson, Dr. Ash, Dr. Kenrick, W. Johnson, Mr. Smith, Perry, and Bailey, are for the second pronunciation of this word; and Mr. Sheridan, Mr. Nares, Buchanan, and Entick, for the first; and this, notwithstanding the majority of suffrages against it, is, in my opinion, decidedly most agreeable to the best usage. It were undoubtedly to be wished that words of this form preserved the accent of the verb to which they correspond; but this correspondence we find entirely set aside in lamentable, comparable, admirable, and many others, with which disputable must certainly class. Mr. Scott gives both modes of accenting this word; but, by his placing the word with the accent on the first syllable first, we may presume he prefers this pronunciation.—See INDISPUTABLE. W.

DISSOLVIBLE, diz-zôl'-vê-bl. *a.* Liable to perish by dissolution. *Hale.*

✠ If this word and its etymon must be written *dissolvable* and *solvable*, and not *dissoluble* and *soluble*, because *solveo* and its compounds in Latin are of the third conjugation, and form their personal and temporal variations by assuming *i*, there is no reason why *resoluble* should be written with *a*, as it stands in Johnson, who, notwithstanding he writes *dissoluble* here with an *i*, yet, in his explanation of the etymology of *indissoluble*, tells us it is formed from *in*, and *dissoluble* with an *a*. *W.*

DISUNION, dis-û'-nê-ûn. *n. s.* [*dis* and *union*.] Separation; disjunction. *Glanville*. Breach of concord.

Some curious inspector may, perhaps, wonder why I have given *disunion*, *disuse*, &c. the pure *s*, and not the *z*, since I have laid it down as a general rule, under the prepositive particle *dis*, that the *s* immediately before the accent, when a vowel begins the next syllable, is

—nò, mòve, nòr, nòt; —tùbe, túb, báll; —díl; —pòund; —thin, THIS.

always flat; but it must be remembered, that long *u* in these words is not a pure vowel, 8; not that I think the *z*, in this case, would be palpably wrong; for, though long *u* may be called a semi-consonant, it is sufficiently vocal to make the *s*, or *z*, sound, in these words, perfectly indifferent.—See *Dia. W.*

To DIVERTISE §, *dè-vêr'-tîz*. *v. a.* [*divertiser*, Fr.] To please; to exhilarate. *Dryden.* Little used.

☞ Dr. Johnson seems to have accented this word on the last syllable, in compliance with the verb *advertise*, which is exactly of the same form, and therefore, he thought, ought to be accented in the same manner. But, by making *divertise* conform in accentuation to *advertise*, we make the general rule stoop to the exception, rather than the exception to the general rule. For, in all verbs of three or more syllables, where the termination *ise* is only the verbal formation, and does not belong to the root, we never find the accent on it; as, *criticise, exercise, epitomise, &c.*—See **ADVERTISE-MENT**. *W.*

DO'LOUR, dól'-lúr. 314. *n. s.* [*dolor*, Lat.] Grief; sorrow. *Shak.* Lamentation; complaint. *Sidney.* Pain; pang. *Bacon.*

Mr. Nares, W. Johnston, Buchanan, Elphinston, and Entick, make the first *o* in this word short, as in *dollar*; and Mr. Sheridan, Mr. Scott, Mr. Perry, and Dr. Ash, long, as in *donor*: the latter is, in my opinion, the most analogical. 542. *W.*

DO'LPIN, dól'-fín. *n. s.* [*dolphin*, Lat.] The name of a fish. *Shakspeare.*

DOLT, dól't. *n. s.* [Dol, Sax.] A heavy, stupid fellow; a blockhead. *Sidney.*

DOMA'TY, dó-má'té'. *n. s.* [*domaine*, Fr.] Dominion; empire. *Milton.* Possession; estate. *Dryden.* The land about a mansion-house occupied by the lord. *Shenstone.*

DO'MAL*, dóm'-mál. *a.* Relating to the astrological use of house. *Addison.*

DO'ME, dómé. *n. s.* [*dome*, Fr.] A building; a house; a fabrick. *Prior.* A hemispherical arch; a cupola. *Shenstone.*

There is a strong propensity, particularly in the people of London, to pronounce this word so as to rhyme with *room*; but this is contrary to all our dictionaries which give the sound of the vowels, and ought not to be suffered to add to the already too numerous exceptions to the general sound of *o*. *W.*

DOMESDAY*. See DOOMSDAY.

DOMESMAN*, dóm'mz'-mán. *n. s.* [Dome, Sax.] An umpire; a judge. *Wicliffe. Ob. J.*

DO'MESTICAL, dóm-més'-tè-kál. } *a.* [*domesticus*, Lat.] Belonging to the house. *Hooker.* Private; done at home.

Hooker. Inhabiting the house; not wild. *Addison.* Not foreign; intestine. *Hooker.*

Dr. Johnson observes, that, of English, as of all living tongues, there is a double pronunciation, one cursory and colloquial, the other regular and solemn. He gives no instances of this double pronunciation; and it is at first a little difficult to conceive what are the words in which this observation is verified. Solemn speaking seems to have no effect upon the accented vowels; for, let us pronounce them as rapidly or as solemnly as we will, we certainly do not make any change in the quantity or quality of them. The only part of the language, in which Dr. Johnson's observation seems true, is some of the vowels when unaccented; and of these the *o* seems to undergo the greatest change in consequence of solemnity or rapidity. Thus the *o* in *obey* is, in solemn speaking, pronounced as long and full as in the first syllable of *open*; but, in rapid and cursory speaking, as short as the *o* in *oven*. This latter sound, however, must not be given as a model; for, let the pronunciation be ever so rapid and familiar, there is a certain elegance in giving the *o*, in this situation, its full, open sound, approaching to that which it has when under the accent; and, though nothing but a delicacy of ear will direct us to the degree of openness with which we must pronounce the unaccented *o* in *domestic*, *docility*, *potential*, *proceed*, *monastic*, *monotony*, &c., we may be assured that these vowels are exactly under the same predicament, and can never be pronounced short and shut, as if written *domestick*, *docility*, *potential*, &c., without hurting the ears of every good speaker, and overturning the first principles of pronunciation. 547, 548.

The same observations seem to hold good of the unaccented *o* in every word ending in *ory*; as *transitory*, *dilatatory*, &c. The *o* in rapid speaking certainly goes into short *x*, as if written *transitory*, *dilatatory*, &c., but, in solemn pronunciation, approaches to the accented, open sound of *o* in *glory*, *story*, &c.; but, as the *o* in these terminations never admits of being pronounced quite so open as when ending a syllable before the accent, I have, like Mr. Sheridan, given it the colloquial sound of short *u*. 512.—See COMMAND. *W.*

sentation to the ordinary, or institution by the ordinary, or induction by his orders. *Cowel*.

☞ I have differed from Mr. Sheridan, Mr. Scott, W. Johnston, and Entick, in the quantity of the vowel in the first syllable of this word, not only as I think it contrary to the best usage, but as it is at variance with the analogy of words in this termination. Let not the long quantity of the Latin *o* in *donatio* be pleaded in favour of my opponents; for (waving the utter uncertainty of arguing from the Latin quantity to ours) this would prove that the *a* and *e* in the first syllable of *sanative* and *lenitive* ought to be long likewise. Dr. Kenrick, Dr. Ash, and Mr. Perry, are on my side. *W.*

DONE, *dôn*, *part. pass.* of the verb *To do*.

DONE*, *dôn*, *The old infinitive of Do*.

§ The last mode of pronouncing this word is that which was universally current till within these few years; but the first has insensibly stolen into use, as we may observe from the several dictionaries which have adopted it. Mr. Sheridan, W. Johnston, Mr. Nares, and, as far as we can judge by the position of the accent, Entick and Bailey pronounce it with the first *a* long; and Dr. Kenrick, Buchanan, and, if we may guess at Dr. Ash by his accent, with the same letter short. Mr. Scott gives both ways; but, by placing the sound with the long *a* first, seems to prefer it. The authorities are certainly on the side I have adopted; but I wish also to establish it by analogy.

And, first, it may be observed, that, if any argument can be drawn from the Latin quantity to the English, it is certainly in favour of the first pronunciation; for, in a Latin word of two syllables, where a consonant comes between two vowels, the consonant always goes to the last, and the first vowel is pronounced long, without the least regard to the quantity. Thus, *Crâtes*, the philosopher, and *crâtes*, a hurdle; *dêcus*, honour, and *dêdo*, to give; *ûeo*, to triumph, and *ûeum*, an egg; *Nûma*, the legislator, and *nûmen*, the divinity, have the first vowels always sounded long, by an English speaker, although in the Latin the first vowel in the first word of each of these pairs is short. From this universal manner of pronouncing Latin words, though contrary to Latin quantity, it is no wonder, when we adopt words from that language without any alteration, we should pronounce them in the same manner; and it may be fairly concluded, that this uniform pronunciation of the Latin arises from the genius of our own tongue; which always inclines us to lengthen the accented vowel before a single consonant in words of two syllables; or, otherwise, what reason can we assign for the rule laid down by our ancestors for doubling the consonant in verbs, verbal nouns, and participles, where a single vowel was preceded by a single consonant in the theme? But an affectation of Latinity seems to have disturbed the general pronunciation of our own language, as much as our own pronunciation has disturbed the Latin quantity: for, though we neglect the quantity of Latin dissyllables, when we are pronouncing that language, yet, in dissyllables of our own, formed from the Latin,

and anglicised, we seem to be, in some measure, guided by the Latin quantity. To what else can we attribute the short sound of the first vowel in *magick, placid, tepid, vigil, novel*, &c. & to what but the genuine force of vernacular pronunciation can we ascribe the long sound of *u* in this situation, let the quantity of the Latin original be what it will? Thus, though *epick, topick, cynick, and tonick*, have the first vowel short, *tunick, stupid, Cupid, tumid*, &c. have the *u* long, though always short in the Latin words from which they are derived. But however this may be in words anglicised from the Latin, and ending in a consonant, perhaps, in nothing is our pronunciation more regular than in the quantity of the first vowel in a word of two syllables ending with a vowel: in this case the first vowel is invariably long; and why the word in question should be the only exception, cannot easily be accounted for. We have no words originally English of this form; but those we adopt from other languages sufficiently show the analogy of pronunciation: thus *gola, coma, China, era, strata, quota, fêo, daddo, sago, bravo, tyro, hero, negro*, &c. &c. have all the first syllable long; and why *drama* should not fall into the same analogy, I cannot conceive. A corroboration of this is the pronunciation of *lama, Brama, Zama, and Zara*, and all proper names of the same form from the Greek and Latin, as *Cato, Plato, Strato, Crito, Draco*, &c. & I think it may be with confidence asserted, that an Englishman, who had never heard the word *drama* pronounced, would naturally place the accent upon the first syllable, and pronounce the vowel in that syllable long and slender. 544. *W.*

To DROIL, drôil. *v. n.* To work sluggishly and slowly; to plod. *Spenser*.

DROLL §, drôle. 406. *n. s.* [drôle, Fr.] One whose business is to raise mirth by petty tricks; a jester; a buffoon. *Howell*. A farce. *Swift*.

¶ When this word is used to signify a farce, it is pronounced so as to rhyme with *doll*, *toll*, &c. 406. If this wanted proof, we might quote *Swift*, who was too scrupulous to rhyme it with *extol*, if it had not been so pronounced:

"Some as justly fame extols,
"For lofty lines in Smithfield drolls."

This double pronunciation of the same word to signify different things is a gross perversion of language. Either the orthography or the pronunciation ought to be altered. *Droll*, when signifying a farce, ought either to be pronounced so as to rhyme with *hole*, or to be written with only one *l*.—See *Bowl*. *W*.

To DROLL, drôle. *v. n.* To jest; to play the buffoon. *Glanville*.

To DROLL*, drôle. *v. a.* To cheat; to trick. *L'Estrange*.

§ Dr. Johnson, Dr. Ash, Dr. Kenrick, and Buchanan, accent this word on the second syllable; and Mr. Sheridan, Mr. Nares, Mr. Scott, W. Johnston, Perry, Entick, and Bailey, on the first. That this is in possession of the best usage I have not the least doubt; and that it is agreeable to the analogy of accenting words from the learned languages, which we naturalize by dropping a syllable, is evident from the numerous class of words of the same kind.—See **ACADEMY**, **INCOMPARABLE**, &c. A collateral proof, too, that this is the true pronunciation is, that *mesentery*, a word of the same form, is by all the above-mentioned lexicographers who have the word, except Bailey, accented on the first syllable. *W.*
DY/SNOMY*, dis'-nò-mè, *n. s.* [δυσνομία.] Ill ordering of laws; or the enacting bad laws. *Cockeram*.

ECCLESIASTICAL §, êk-klē-zhè-âs'-tê-kâl. } *a.*
ECCLESIASTICK §, êk-klē-zhè-âs'-tîk. }
[*ecclesiasticus*, Lat.] Relating to the church. *Hooker.*

ECCLESIASTICK, êk-klē-zhè-âs'-tîk. *n. s.* A person dedicated to the ministries of religion. *Burnet.*

☞ I have given these words the flat *s* aspirated, as I am convinced it is quite agreeable to the analogy of pronunciation; for the third syllable, coming after the secondary accent, is exactly under the same predicament as the penultimate syllable in *ambrosial*, *Ephesian*, *Geodesian*, &c.—See *Principles*, No. 451.

“And pulpit drum *ecclesiastick*

“Was beat with fist instead of a stick.”—*Hudibras. W.*

ECCLESIASTICUS*, êk-klē-zhè-âs'-tê-kûs. *n. s.* [Lat.] One of the books which form the Apocrypha. *Arnold.*

ECLAIRCISSEMENT, êk-klâre'-sîz-mênt. *n. s.* [Fr.] Explanation; the act of clearing up an affair. *Clarendon.*

☞ This word, though long in use, is not yet naturalized. Every syllable but the last may be perfectly pronounced by an Englishman who does not speak French; but this syllable, having a nasal vowel, not followed by hard *c* or *g*, (see *ENCORE*), is an insuperable difficulty: the nearest sound to it would perhaps be to make it rhyme with *long* and *strong*. But a speaker would, perhaps, risk less by pronouncing it like an English word at once, than to imitate the French sound awkwardly. *W.*

ECLA'T, ê-klâw'. 472. *n. s.* [Fr.] Splendour; show; lustre. *Pope.*

ECLE'TICK §, êk-lêk'-tîk. *n. s.* [ἐκλεκτικός.] One of those ancient philosophers, who, without attaching themselves to any particular sect, took from any what they judged good. *Dryden.* One of a sect in the Christian church, who considered the doctrine of Plato conformable to the spirit of the Christian. One of a sect of physicians among the ancients.

ECLE'TICK, êk-lêk'-tîk. *a.* Selecting. *Watts.*

ECLE'GM, êk-lêm'. *n. s.* [Êk and λείγω.] A form of medicine made by the incorporation of oils with sirups. *Quincy.*

ECLIPSE §, ê-kîps'. *n. s.* [ἐκλεισις.] An obscuration of the luminaries of heaven. *Locke.* Darkness; obscuration. *Raleigh.*

EDICT, *ê-dîkt*. n. s. [*edictum*, Lat.] A proclamation, or command, or prohibition; a law promulgated. *Hooker.*

Good speakers seem divided about the quantity of the vowel in the first syllable of this word. *Kenrick*, *Perry*, and *Buchanan*, make it short; and *Sheridan*, *Nares*, *Entick*, *Ash*, *Scott*, and *W. Johnston*, long. This majority has induced me to make it long likewise, and not any length of the same letter in the Latin *edictum*; for, though the Latin accent is frequently a rule for the placing of ours, the quantity of Latin has almost as little to do with our quantity as it has with that of the Chinese or Hebrew.—See *Introduction to Rhyming Dictionary*, page xix. *W.*

EDIFICANT*, *ê-dîf-ê-kânt*. a. Building; constructing. *Dugard.*

EDIFICATION, *êd-ê-fê-kâ-shûn*. n. s. A building; but most commonly instruction. The act of building up man in the faith; improvement in holiness. *Bp. Taylor.* Improvement; instruction. *Addison.*

To EDUCATE, *êd-jû-kâte*. 91. v. a. [*educuo*, Lat.] To breed; to bring up; to instruct youth. *Dryden.*

This pronunciation may seem odd to those who are not acquainted with the nature of the letters; but it is not only the most polite, but, in reality, the most agreeable to rule.—See *Principles*, No. 294, 376. *W.*

EDUCATION, *êd-jû-kâ-shûn*. n. s. Formation of manners in youth; nurture. *Hooker.*

EDUCATOR*, *êd-jû-kâ-tûr*. n. s. One that instructs youth. *Dr. Vincent.*

EFF, *êf*. n. s. A small lizard.

EFFABLE, *êf-fâ-bl*. 405. a. [*effabilis*, Lat.] Expressive; utterable. *Wallis.*

To EFFACE, *êf-fâse*. v. a. [*effacer*, Fr.] To destroy any thing painted or carved. To blow out; to strike out. *Locke.* To destroy; to wear away. *Dryden.*

The strong tendency of the vowel to open, when it terminates a syllable, immediately before the accent, makes us frequently hear the *e* in these words, when the accent is on the second syllable, pronounced as open as if there were but one *f*. The same may be observed of the *o* in occasion, offence, official, &c. This is certainly a deviation from rule; but it is so general, and so agreeable to the ear, as to be a distinguishing mark of elegant pronunciation. *W.*

To EFFASCINATE*, *êf-fâs-sê-nâte*. v. a. To bewitch; to charm. *Cockeram.*

tends to doubt of every thing but his own existence.

Reid.

E/GOTISM, *ê-gô-tîzm. n. s.* The fault committed

in writing by the frequent repetition of the word

ego, or I; too frequent mention of a man's self.

Spectator.

Contrary to my own judgement, I have made the *e*

in the first syllable of this word long, because I see it

is uniformly so marked in all the dictionaries I have

seen: but I am much mistaken if analogy does not in

time recover her rights, and shorten this vowel by join-

ing it to the *g*, as if written *eg-o-tism*; not because this

vowel is short in the Latin *ego*, (for the English quan-

tity has very little to do with the Latin,) but because

the word may be looked upon as a simple in our lan-

guage, and the accent is on the antepenultimate syl-

lable. Mr. Elphinston, whose opinion in this point is of

the greatest weight, makes the first vowel short.—See

Principles, No. 511, 530, 535. *W*.

E/GOTIST, *ê-gô-tîst. n. s.* One that is always re-

peating the word *ego*, I; a talker of himself. *Spect*.

E/GOTISTICAL*, *ê-gô-tîst-ê-kâl. a.* Self-conceit-

EIGH, *ây. interj.* An expression of sudden delight

EIGHT*, *ây. n. s.* [ihs'gâ, Sax.] An island in a

river. *Evelyn*.

EIGHT^g, *ây. a.* [eah'ta, Sax.] Twice four. A

word of number. *Sundys*.

The genuine sound of the diphthong in this word and

its compounds does not seem to be that of the first sound

of *a*, which Mr. Sheridan has given it under the second

sound of *a*, but a combination of the first sound of *a* and *e*

pronounced as closely together as possible. But, as this

distinction is very delicate, and may not be more

easily apprehended than that between *meat* and *meet*,

246, I have given the diphthong the same sound as Mr.

Sheridan has done. *W*.

EIGHTH, *âyth. a.* [ehteoða, Sax.] Next in order to the seventh; the ordinal of eight. *Shakspeare*.

This word, as it is written, by no means conveys the sound annexed to it in speaking; for the abstract termination *th*, being a perfect lisp, is quite distinct from the final *t* of *eight*, and can never coalesce with it without depriving the word of one of its letters. The only sound conveyed by the letters of this word, as now spelt, is as if written *ayth*: and if we would spell this sound, as we pronounce it, and as the analogy of formation certainly requires, we must necessarily write it *eightth*. This would have an unusual appearance to the eye; and this would be a sufficient reason with the multitude for opposing it; but men of sense ought to consider, that the credit of the language is concerned in rectifying this radical fault in its orthography. *W*.

EIGHTEEN, *ây'-têên. a.* Twice nine. *Shakspeare*.

EIGHTEENTH, *ây'-têenth. a.* The next in order to the seventeenth. *1 Kings*.

EIGHTFOLD, *ây'-fôld. a.* Eight times the number or quantity.

ELECTARY, èl-èkt'-târ-è. *n. s.* A form of medicine made of conserves and powders, of the consistence of honey.

☞ This is an alteration of the word *electuary*, which has taken place within these few years; and, it must be owned, is an alteration for the better; for, as there is no *u* in the Latin *electarium*, there can be no reason for inserting it in our English word, which is derived from it. *W.*

ELECTION, èl-èkt'-shûn. *n. s.* [*electio*, Lat.] The act of choosing; choice. *Milton.* The power of choice. *Davies.* Voluntary preference. *Rogers.* Discernment; distinction. *Bacon.* [In theology.] The predetermination of God by which any were selected for eternal life. *Atterbury.* The ceremony of a public choice. *Addison.*

¶ Our own analogy would lead us to place the accent upon the second syllable of this word, [*Perry* and *Webster* do so place it,] but its derivation from the Latin *elegiacus*, and the Greek *ελεγιακος*, (in both which the antepenultimate is long) obliges us, under pain of appearing grossly illiterate, to place the accent on the same letter. But it may be observed, that we have scarcely an instance in the whole language of adopting a Latin or Greek word, and curtailing it of a syllable, without removing the accent higher on the English word.—See *ACADEMY*. *W*.

 The affinity between the long *e* and the short *i*, when immediately followed by the accent, has been observed under the word *despatch*.—But this affinity is no where more remarkable than in those words where the *e* is followed by *m* or *n*. This has induced Mr. Sheridan to spell *embrace*, *endow*, &c. *imbrace*, *indow*, &c.; and this spelling may, perhaps, sufficiently convey the cursory or colloquial pronunciation; but my observation greatly fails me if correct public speaking does not preserve the *e* in its true sound, when followed by *m* or *n*. The difference is delicate, but, in my opinion, real. *W*.

EMPIRE δ , êm'-pîrê. 140. *n. s.* [empire, Sax.] Imperial power; supreme dominion. *Roussé*. The region over which dominion is extended. *Temple*. Command over any thing.
¶ I have differed from Mr. Sheridan and Buchanan in the pronunciation of the last syllable of this word, as I think the long sound of *i* is more agreeable to the ear, as well as to the best usage, though I confess not so analogous as the short *i*. Dr. Kenrick, Scott, W. Jo'nston, and Perry, pronounce the *i* long, as I have done. See **EMPIRE**. *W.*
EMPIRICK δ , êm'-pê-rîk, or êm-pîr'-îk. *n. s.* [ἐμπειρικός.] One of a sect of the ancient physicians, who formed for themselves rules and methods on their own practice and experience, and not on any knowledge of natural causes, or the study of good authors. *Hakewill*. A trier; an experimenter; a quack; such persons as have no true knowledge of physical practice, but venture upon observation only. *Hooker*.
¶ Dr. Johnson tells us, the first accentuation is adopted by Dryden, and the last by Milton; and this he prefers. There is, indeed, a strong analogy for the last, as the word ends in *ick*, 509; but this analogy is sometimes violated in favour of the substantives, as in *lunatick*, *heretick*, &c.; and that this is the case in the word in question, may be gathered from the majority of votes in its favour; for, though Dr. Johnson, Mr. Sheridan, Mr. Nares, and W. Johnston, are for the latter; Dr. Kenrick, Dr. Ash, Mr. Scott, Mr. Perry, Buchanan, Entick, Bailey, and Barclay, are for the former. This word classes, too, with those that almost always adopt the antepenultimate accent, 503; but the adjective has more properly the accent on the second syllable. *W.*
EMPIRICAL, êm-pîr'-ê-kâl. δ . Versed in experience. *Shakspeare*.
EMPIRICK, êm-pîr'-îk. δ . [m]ents. *Milton*. Known only by experience. *Shakspeare*.

EMPORIUM, êm-pô'-rê-ûm. n. s. [*ἐμπορίον*.] A place of merchandise; a mart; a commercial city. *Burton*.

To EMPOVERISH, êm-pôv'-êr-îsh. v. a. [*pauper*, Fr.] To make poor; to depauperate; to reduce to indigence. *Sidney*. To lessen fertility.

[F] This word, before Dr. Johnson's dictionary was published, was always written *impovertish*; nor, since he has reformed the orthography, do we find any considerable difference in the sound of the first syllable, except in solemn speaking; in this case we must undoubtedly preserve the *c* in its true sound.—See *EMBALM*. *W*.

EMPOVERISHER, êm-pôv'-êr-îsh-ûr. n. s. One that makes others poor. That which impairs fertility. *Mortimer*.

EMPOVERISHMENT, êm-pôv'-êr-îsh-mênt. n. s. Depauperation; cause of poverty. *Spenser*.

To EMPOWER, êm-pôû'-ûr. v. a. To authorize; to commission; to give power. *Dryden*. To give natural force; to enable. *Baker*.

EMPRESS, êm'-prês. n. s. [contracted from *empress*.] The wife of an emperor. *B. Jonson*. A female invested with imperial dignity. *Milton*.

EMPTION, êm'-shûn. n. s. [*emptio*, Lat.] The act of purchasing; a purchase. *Arbutnot*.

EMPTY, êm'-tê. 412. a. [*ἐμτῖς*, Sax.] Void; having nothing in it; not full. *Shak*. Evacuated; no longer full. *Spenser*. Devoid; unfurnished. *Newton*. Unsatisfactory; unable to fill the mind

or desires. *Pope*. Without any thing to carry; unburthened; unfreighted. *Exod.* iii. Hungry. *Shak*. Vacant of head; ignorant; unskillful. *Raleigh*. Unfruitful; barren. *Genesis*. Wanting substance; vain. *Dryden*.

To EMPTY, êm'-tê. v. a. To evacuate; to exhaust. *Shakspeare*.

To EMPTY*, êm'-tê. v. n. To become empty. *B. Jonson*.

To EMPURPLE, êm-pûr'-pl. v. a. To make of a purple colour. *Milton*.

EMPUSE*, êm-pûse'. n. s. [*ἐμψυα*.] A phantom; a spectre. *Bp. Taylor*.

To EMPUZZLE, êm-pûz'-zl. v. a. To perplex; to put to a stand. *Brown*.

EMPYEMA, êm-pî'-ê-mâ. 92. n. s. [*ἐμπύημα*.] A collection of purulent matter in any part whatsoever; generally used to signify that in the cavity of the breast only. *Quincy*.

[F] I have differed from Mr. Sheridan in the sound of the *y* in the second syllable of this word, merely from the disagreeable effect it has on the ear, to pronounce two vowels of exactly the same sound in immediate succession. This sameness is, in some measure, avoided by giving *y* the long diphthongal sound of *i*; and the same reason has induced me to the same notation in the word *empyrean*. If good usage is against me, I submit. *W*.

EMPYREAL, êm-pîr'-ê-âl. a. [*ἐμψυρος*.] Formed of the element of fire; refined beyond aerial. *Milton*.

EMPYREAN, êm-pîr'-ê-ân, or êm-pîr'-ê-ân. [See *EMPYEMA*.] n. s. The highest heaven, where the pure element of fire is supposed to subsist. *Milton*.

[F] This word has the accent on the penultimate syllable in Sheridan, Kenrick, Barclay, Nares, and Bailey; and on the antepenultimate in Ash, Buchanan, Perry, and Entick; and this last accentuation is, in my opinion, the most correct; for, as the penultimate is short, there is the same reason for placing the accent on the antepenultimate as in *cerulean*; though poets, with their usual license, generally accent the penultimate.—See *EUROPEAN*. *W*.

EMPYREAN*, êm-pîr'-ê-ân. or êm-pîr'-ê-ân. a. Empyrean. *Akenside*.

EMPYREUM, êm-pîr'-ê-ûm. } n. s. [*ἐμπύρευμα*.]

¶ Though, in cursory speaking, we frequently hear the *e* confounded with the short *i* in the first syllables of *encomp*, *enchant*, &c., without any great offence to the ear, yet such an interchange in *encomium*, *encomiast*, &c., is not only a departure from propriety, but from politeness; and it is not a little surprising that Mr. Sheridan should have adopted it. The truth is, preserving the *e* pure in all words of this form, whether in rapid or deliberate speaking, is a correctness well worthy of attention. *W.*

ENCUMPASSMENT, ên-kûm'-pâs-mént. *n. s.* Circumlocution; remote tendency of talk. *Shakespeare*.

ENCORE, ông-kôre'. *ad.* [Fr.] Again; once more. *Pope*.

¶ This word is perfectly French, and, as usual, we have adopted it with the original pronunciation. In other words which we have received from the French, where the nasal vowel has occurred, we have substituted an awkward pronunciation in imitation of it, which has at once shown our fondness for foreign modes of speaking, and our incapacity of acquiring them: thus *caisson* has been turned into *cassoon*, *balloon* into *balloon*, *dragon* into *dragon*, and *Chamont* (a character in the Orphan) into *Shamoon*; but in the word before us, this nasal sound is followed by *c* hard, which after *n* always involves hard *g*, 408; and this is precisely an English sound. An Englishman, therefore, does not find the difficulty in pronouncing the nasal sound in this word, which he would in another that does not admit of the succeeding hard *c* or *g*; as *entendement*, *attentif*, &c.: for if, in pronouncing the *en* in these words, the tongue should once touch the roof of the mouth, the French nasal sound would be ruined. No wonder, then, that a mere English speaker should pronounce this French word so well, and the rest of the nasal vowels so ill. It does not arise from the habit they contract at theatres, (where it would be the most barbarous and ill-bred pronunciation in the world to call for the repetition of an English song in plain English.) It does not, I say, arise from custom, but from coincidence. The sound, in the word before us, is common to both nations; and, though the French may give it a somewhat lighter sound than the English, they are both radically the same. Adopting this word, however, in the theatre, does the English no manner of credit. Every language ought to be sufficient for all its pur-

poses. A foreigner who understood our language, but who had never been present at our dramatick performances, would suppose we had no equivalents in English, should he hear us cry out *encore*, *bravo*, and *bravissimo*, when we only wish to have a song repeated, or to applaud the agility of a dancer. *W.*

To ENCORE*, ông-kôre'. *v. a.* To call on a singer or speaker for the repetition of a song or speech. *Whitehead*.

ENCOUNTER §, ên-kôûn'-tûr. 313. *n. s.* [*encontre*, Fr.] Duel; single fight; conflict. *Shak.* Battle, fight in which enemies rush against each other. *Milton*. § I have given the last syllable of this word the long sound, as I am convinced it is the most correct; though I am of opinion that, in the military profession, it is oftener pronounced short, as if written *ensin*. Some reasons from analogy might be produced in favour of this latter pronunciation, 144; but they do not seem sufficient to outweigh the more general usage which declares for the former. *W.*

To ENSIGN*, ên-she'. *v.a.* [ensigner, old Fr.] To mark with some sign. *B. Jonson*.

ENSIGNBEARER, ên-she-bâ-rûr'. *n.s.* He that carries the flag; the ensign. *Sidney*.

ENSIGNCY*, ên'-shn-sê. *n.s.* The place and quality of the officer who carries the flag.

§ I have not met with this word in any of our dictionaries, but, from its very frequent use in the polite world, am persuaded it deserves a place there, and particularly in a pronouncing dictionary; as it must be remarked that, though the second syllable of *ensign* is generally, and more correctly, pronounced with the *i* long, the same letter, in the same syllable of *ensigncy*, is always short. *W.*

ENSKI/ED*, ên-skide'. *part. a.* [from *sky*.] Placed in heaven; made immortal. *Shakspeare*.

To exempt any thing from hazard by paying a certain sum, on condition of being reimbursed for miscarriage. To promise reimbursement of any miscarriage for a certain reward stipulated. *L'Estrange*. To bind by promise of marriage. *Cavendish*.

§ As this word and its compounds come from the word *sure*, they all retain the aspirated pronunciation of the *s* in that word, 454; and it is not a little surprising that Mr. Sheridan has omitted to mark it. *W.*

ENSURER, ên-shû'-rûr. *n.s.* One who makes contracts of insurance. *Hammond*. That which secures, or makes sure. *Hay*.

To ENSWEEP*, ên-swêep'. *v.a.* To pass over with swiftness. *Thomson*.

To ENVELOPE §, ên-vêl'-ûp. *v. a.* [*enveloper*, Fr.] To inwrap; to cover. *Chaucer.* To hide; to surround. *Locke.* To line; to cover on the inside. *Spenser.*

ENVELO/PE, ên-vêl'-ûpe'. [ên'-vêl'-ûpe, *Perry*; ên-vêl'-ûpe', *Jones*; ên-vêl'-ûp, *Webster*.] *n. s.* [Fr.] A wrapper; an outward case. *Burnet.*

§ This word, signifying the outward case of a letter, is always pronounced in the French manner by those who can pronounce French, and by those who cannot, the initial *e* is changed into an *o*. Sometimes a more Englishman attempts to give the nasal vowel the French sound, and exposes himself to laughter by pronouncing *g* after it, as if written *ongvelope*. This is as ridiculous, to a polite ear, as if he pronounced it, as it ought to be pronounced, like the verb to *envelope*. *W.*

ENVELOPEMENT*, ên-vêl'-ûp-mênt. *n. s.* Perplexity; entanglement. *Search.*

To ENVENOM, ên-vên'-âm. 166. *v. a.* [from *venom*.] To taint with poison; to poison. *Shak.* To make odious. *Shak.* To enrage; to exasperate. *Dryden.*

To ENVERMEL*, ên-vêr'-mêl. *v. a.* [*vermeil* Fr.] To dye red. *Milton.*

ENVIA/BL, ên'-vê-â-bl. 405. *a.* Deserving envy; such as may excite envy. *Carew.*

ENVIER, ên'-vê-îr. 98. *n. s.* One that envies another; a maligner. *Bacon.*

ENVIOUS, ên'-vê-ûs. 314. *a.* Infected with envy; pained by the excellence or happiness of another. *Sidney.*

ENVIOUSLY, ên'-vê-ûs-lê. *ad.* With envy; with malignity; with ill-will. *Duppa.*

To ENVIRON §, ên-vî'-rûn. 166. *v. a.* [*environner*, Fr.] To surround; to encompass. *Josiah*, vii. To involve; to envelope. *Donne.* To surround in a hostile manner; to besiege; to hem in. *Shak.* To enclose; to invest. *Cleveland.*

ENVIRONS, ên-vê-rûnz', or ên-vî'-rûnz. 166. *n. s.* [*environs*, Fr.] The neighbourhood or neighbouring places round about the country. *Lord Chesterfield.*

§ This word is in general use, and ought to be pronounced like the English verb to *environ*: but the vanity of appearing polite keeps it still in the French pronunciation; and, as the nasal vowels in the first and last syllables are not followed by hard *c* or *g*, it is impossible for a mere Englishman to pronounce it fashionably.—See **ENCORE**. *W.*

ENVOY §, ên'-vôê. *n. s.* [*envoye*, Fr.] A public minister sent from one power to another. *Denham.* A public messenger, in dignity below an ambassador. *Sir T. Herbert.* A messenger. *Blackmore.* Formerly a kind of postscript, sent with compositions, to enforce or recommend what had been previously written, whether in prose or rhyme. *War-ton.*

ENVOYSHIP*, ên'-vôê-shîp. *n. s.* The office of an envoy. *Coventry.*

To ENVY §, ên'-vê. *v. a.* [*envier*, Fr.] To hate another for excellence, happiness, or success. *Prov.* iii. To grieve at any qualities of excellence in another. *Shak.* To grudge; to impart unwillingly; to withhold maliciously. *Dryden.*

§ The ancient pronunciation of this word was with the accent on the last syllable, and the *y* sounded as in *eye*, as the Scotch pronounce it at this day. *W.*

To ENVY, ên'-vê. *v. n.* To feel envy; to feel pain at the sight of excellence or felicity. *Bp. Taylor.*

ENVY, ên'-vê. 182. *n. s.* Pain felt and malignity conceived at the sight of excellence or happiness. *Ray.* Rivalry; competition. *Dryden.* Malice; malignity. *Shak.* Public odium; ill-repute. *Bacon.*

ENVYING*, ên'-vê-îng. *n. s.* Ill-will; malice. *Galatians* v.

EO'LIK*, ê-ô'-lîk. } one of the five dialects of
the Greek tongue. Also a particular kind of verse;
and, in musick, one of the modes of the ancients.
Milton.

EO'LIAN Harp*, ê-ô'-lè-ân-hârp. An instrument so called from *Æolus*, the heathen deity of winds; as it produces its wild and often exquisite strains merely by the action of the wind. *Thomson.*

EO'LIPILE, ê-ô'-lî-pîle. *n. s.* [*Æolus* and *pila*.] A hollow ball of metal with a long pipe; which ball, filled with water and exposed to the fire, sends out, as the water heats, at intervals, blasts of cold wind through the pipe. *Burnet.*

E'PACT, ê'-pâkt. *n. s.* [πακτός.] A number, whereby we note the excess of the common solar year above the lunar, and thereby may find out the age of the moon every year. *Harris.*

EPÆNETICK*, êp-ê-nêl'-îk. *a.* [ἐπαινητικός.] Laudatory; panegyric. *Phillips.*

EPA'ULEMENT, ê-pâwl-mént. *n. s.* [Fr.] [In fortification.] A sidework made either of earth thrown up, of bags of earth, gabions, or of fascines and earth. *Harris.*

EPAULET*, êp'-âw-lét. *n. s.* [επαulette, Fr.] An ornament for the shoulder; a shoulder-knot; chiefly now a military word. *Burke.*

EPHE'MERA, ê-fêm'-ê-râ. 92. *n. s.* [ἐφήμερον.] A fever that terminates in one day. An insect that lives only one day.

§ I was much surprised when I found Mr. Sheridan had given the long open sound of *e* to the second syllable of *ephemera*, *ephemeris*, &c. If it was in compliment to the Greek *eta*, the same reason should have induced him to give the sound of long *e* to the first syllable of *hemistich*, *demagogue*, and *rhetorick*. *W.*

EPHE'MERAL, ê-fêm'-ê-râl. 83. } *a.* Diurnal;

EPHE'MERICK, ê-fêm'-ê-rîk. 510. } beginning and ending in a day. *Wotton.*

EPHEMERIDES*, êf-ê-mêr'-ê-dêz. *n. s.* Astronomical tables, showing the present state of the heavens for every day at noon. *Burton.*

EPHEMERIS §, ê-fêm'-ê-ris. *n. s.* [ἐφημερίς.] A journal; an account of daily transactions. An account of the daily motions and situations of the planets. *Dryden.*

EPHEMERIST, ê-fêm'-ê-ris. *n. s.* One who consults the planets; one who studies or practises astrology. *Howell.*

EPHEMERON-WORM, ê-fêm'-ê-rôn-wûrm. *n. s.* A sort of worm that lives but a day. *Derham.*

EPHEMEROUS*, ê-fêm'-ê-rûs. *a.* Beginning and ending in a day. *Burke.*

EPHE'SIAN*, ê-fê'-zhûn. *n. s.* [from *Ephesus*.] One of those in Ephesus, to whom St. Paul addressed an epistle. *Bp. Percy.* In the time of Shakspeare, a vulgar appellation, or familiar phrase, probably derived from the dissolute manners of the Ephesians. *Shakspeare.*

EPHIALTES*, êf-ê-âl'-têz. *n. s.* [ἐφιάλτης.] The disease called the night-mare. *Brund.*

E'PHOD, êf'-ôd, or ê'-fôd. *n. s.* [עֶפְדִּים.] A sort of ornament worn by the Hebrew priests. *Exodus.*

§ Scott, Buchanan, W. Johnston, Nares, and Ash, adopt the first; Entick and Kenrick the last, which, in my opinion, is the best. *W.*

EPICE'DE*, êp-ê-sê-de'. *n. s.* [ἐπικήδειος.] A funeral discourse or song. *Bale.*

EPICE'DIAN*, êp-ê-sê'-dê-ân. *a.* Elegiack; mournful. *Cockeram.*

EPICE'DIUM, êp-ê-sê'-dê-âm. *n. s.* An elegy; a poem upon a funeral. *Sandys.*

E'PICK, êp'-îk. *a.* [ἔπος.] Narrative; comprising narrations, not acted, but rehearsed. *Dryden.*

E'PICK*, êp'-îk. *n. s.* An epick poem. *Campbell.*

EPICURE §, êp'-ê-kû-re. *n. s.* [epicureus, Lat.] A follower of Epicurus; a man given wholly to luxury. *Shakspeare.*

EPICURE'AN*, êp-ê-kû-rê'-ân. [See **EUROPEAN**.] *n. s.* One of the sect of Epicurus. *Acts, xvii.*

EPICURE'AN, êp-ê-kû-rê'-ân. *a.* Pertaining to the sect of Epicurus. *Milton.* Luxurious; contributing to luxury. *Shakspeare.*

E'PICURISM, êp'-ê-kû-rîzm. *n. s.* Luxury; sensual enjoyment; gross pleasure. *Government of the Tongue.* The doctrine of Epicurus. *Waterland.*

§ Mr. Mason tells us, that this word should have the accent on the third syllable. For my own part, I think that accentuation of the word as faulty as the explanation. It seems to me, that Epicureanism is an attachment to the doctrine of Epicurus; and that *epicurism* is formed from the word *epicure*, which signifies a sensualist, and particularly in eating, or rather delicacy in eating. A lady once told Mr. Hume, that she had heard he was a great epicure; No, madam, said he, I am only a glutton. *W.*

TO E'PICURIZE, êp'-ê-kû-rîze. *v. n.* To devour like an epicure. To feast; to riot. *Fuller.* To profess the doctrine of Epicurus. *Cudworth.*

As the last of these words is Latin from the Greek ἐποχή, the Latin accent and quantity on the antepenultimate syllable is preserved by polite speakers; and the first, being anglicised, and containing only two syllables, falls into the quantity of the original. Buchanan, Nares, and Ash, make the first syllable of epoch short; but Perry and Kenrick, in my opinion, make it more properly long. *W.*

EPODE, êp'-ôde, or ê'-pôde. *n. s.* [ἐπώδος.] The stanza following the strophe and antistrophe. *Milton.*

Entick, Scott, Perry, W. Johnston, Nares, and Ash, make the first e short; but Kenrick makes it long, as, in my opinion, it ought to be. *W.*

To ESCHE/W, ês-tshôv'. *v. a.* [schouwen, Teut.] To fly; to avoid; to shun. *Sidney.*

✂ This word, from its being almost antiquated, has escaped the criticism of all our orthoëpists, except Mr. Elphinston, who contends that it ought to be pronounced as if written *esken*. "No wonder *esken*, (he says,) often falsely articulated, because falsely exhibited *eschen*, was ocularly traced from the old *eschoir* (afterwards *echoir*), to devolve or escheat, rather than from

—nô, môte, nôr, nôt;—ûbe, tûb, bûll;—ôll;—pôund;—thin, THIS.

esquiver, to parry, avoid, or *esken*, by those to whom the body of the child and the soul of the parent were equally unknown." The etymological abilities of this gentleman in the French and English languages are unquestionable; but the pronunciation of this word seems fixed to its orthography, and beyond the reach of etymology to alter. Words, like land, have a limitation to their rights. When an orthography and pronunciation have obtained for a long time, though by a false title, it is perhaps better to leave them in quiet possession, than to disturb the language by an ancient, though perhaps better claim. *W.*

[F 559.—Fâte, fâr, fâll, fât;—mê, mêt;—plne, pîn;—

EUROPEAN, yû-rô-pè'-ân. *a.* [*Europæus*, Lat.] Belonging to Europe. *Waller*.

✠ This word, according to the analogy of our own language, ought certainly to have the accent on the second syllable; and this is the pronunciation which unlettered speakers constantly adopt; but the learned, ashamed of the analogies of their own tongue, always place the accent on the third syllable, because *Europæus* has the penultimate long, and is therefore accented in Latin. *Epicurean* has the accent on the same syllable by the same rule; while *Herculean* and *cerulean* submit to English analogy, and have the accent on the second syllable, because their penultimate in Latin is short. *W.*

EURUS, yû'-rûs. *n. s.* [Lat.] The east wind. *Peacham*.

EURHYTHMY, yû'-rîk'-mê. *n. s.* [*εὐρυθμος*] Harmony; regular and symmetrical measure. *Evelyn*.

EUSTYLE*, yû'-stîle. *n. s.* [*εὐ* and *στόλος*] [In architecture.] The position of columns in an edifice at a most convenient and graceful distance one from another.

EUTHANASIA, yû-thân'-â-zhè-â. } 453. *n. s.*
EUTHANASY, yû-thân'-â-sè. 92. } [*εὐθανασία*]
An easy death. *Bp. Hall*.

✠ Of the accent of the first of these words, there can be no dispute; but as the last is anglicised, its accent admits of some diversity of opinion. Mr. Sheridan, Dr. Kenrick, Dr. Ash, Entick, Barclay, Bailey, and the first editions of Dr. Johnson, accent the last of these words on the antepenultimate; but the quarto edition of Johnson on the penultimate: I suspect, however, if we were strictly to follow our own analogy, that we ought to place the accent on the first syllable; for, as this termination is not enclitical, *513*, it seems to be under the same predicament as *academy*, *irreparable*, &c. which see. *W.*

EUTYCHIAN*, yû-tîk'-è-ân. *n. s.* One of those ancient hereticks, who denied the two natures of our Lord Christ; so called from their founder *Eutyches*. *Burnet*.

EUTYCHIAN*, yû-tîk'-è-ân. *a.* Denoting the hereticks called Eutychians. *Tillotson*.

EXACUATION*, êgz-âk'-û-â'-shûn. *n. s.* Whetting or sharpening. *Cockeram.*

To EXAGGERATE è, êgz-âdje'-ê-râte. *v. a.* [*exaggero*, Lat.] To heap upon; to accumulate. *Hale.*

To heighten by representation. *Clarendon.*

☞ This word is sometimes heard with the double *g* hard, as in *dagger*; but every one who has a scrap of Latin knows, that *exaggerate* comes from *exaggero*, and that all words from that language have the *g* soft before *e* and *i*: the third syllable, therefore, must have the *g* soft. But it will be said, that, according to the laws of pronunciation, the first *g* ought to be hard, as the first *c* is in *faccid*, *siccit*, &c. To which it may be answered, that, strictly speaking, it ought to be so; but polite usage has so fixed the first as well as the last *g* in the soft sound, that none but a confirmed podant would have the boldness to pronounce them differently.

This usage, too, we find, is not without all foundation in analogy. Wherever there is a considerable difficulty in keeping sounds separate, they will infallibly run into each other. This is observable in the sound of *z*, which, when final, always adopts the sound of *s* when a flat consonant precedes, 434; the first *s*, likewise, in the terminations *session*, *mission*, &c., necessarily runs into the sound of *sh*, like the last *s*; but it may be said, that the first *g* in *exaggerate* has no such relation to the second as *s* has to *sh*; and that this very difference between the two consonants makes us preserve the first *e*

—nô, môve, nôr, nôt;—tûbe, tûb, bûll;—ôll;—pôund;—thin. THIS.

in *flaccid* and *siccit*y in its hard sound of *k*, which is perfectly distinct from the other sound of *c*, which is nothing more than *s*. To this it can only be replied, by way of mitigation, that hard *g* and soft *g* or *j* are formed nearer together in the mouth than hard *c* or *k*, and soft *c* or *s*; and therefore, as they are more liable to coalesce, their coalescence is more excusable. *W*.

To EX/ICCATE*, êk-sîk'-kâte. v. a. [*exsicco*, Lat.] To dry. *Diet*.

§ The first syllable of this word (strictly speaking) ought to be pronounced according to the rule laid down under the preposition *ex*: but in this pronunciation we totally lose the sharp *s*, which commences the Latin word *sicc*, to dry, of which this word is compounded; and thus the sound of the word is radically injured, and its etymology lost. But, it will be said, the Latins made the same omission of the radical *s*, on account of the coincidence with the *s* contained in the *x* of the preposition, and wrote the word *exsicco*. It is allowed these corruptions obtained amongst them, as amongst us; though it is doubtful whether the same inconvenience arose amongst them in this word, as with us: for *Vossius* makes it highly probable that the Latins never gave the flat sound *ex* to the letter *x*; and the best manuscripts inform us, that writing this word with an *x*, as *exsicco*, and thus preserving the composition distinct and perfect, is the most accurate orthography. *W*.

EXICCA/TION, êk-sîk'-kâ'-shûn. n. s. Arefaction; act of drying up; state of being dried up. *Bentley*.

EX/ILE*, êks'-île. n. s. [*exilium*, Lat.] Banishment; state of being banished. *Shak*. The person banished. *Dryden*.

§ This word, as a substantive, has the accent always on the first syllable; as a verb, it was formerly accented on either syllable; but it is now, as Mr. Nares observes, universally accented as the noun. *W*.

To EX/ILE, êg-zîlê'. 492. [êks'-île.] v. a. To banish; to drive from a country. *Shakespeare*.

EX/ILE*, êg-zîlê'. 478. a. [*exilis*, Lat.] Small; slender; not full; not powerful. *Bacon*.

§ This word, as an adjective derived from the Latin *exilis*, is by Nares, Sheridan, Ash, and Entick, accented on the last syllable. The third edition of Johnson's folio edition has the accent on the last also but the quarto edition has it on the first. Authority is certainly on the side of the ultimate accent; but it may be questioned whether it is not contrary to analogy, &c.

□ 559.—Fâte, fâr, fâll, fât;—mê, mêt;—phne, pîn;—

§ I have differed from Mr. Sheridan in the accentuation of this word. He has placed the accent on the second syllable, with the authority of every dictionary, and of every good speaker, against him. In the first edition of this dictionary, when I supposed Mr. Sheridan's accentuation of this word agreeable to analogy, I did not recollect the verb to *explicate*, whence it is derived, and which, in my opinion, ought to determine its accentuation.—See *Principles*, No. 512. Dr. Johnson, Mr. Scott, Mr. Perry, Dr. Kenrick, Dr. Ash, Entick, and Barclay, place the accent on the first syllable, as I have done. *W.*

FABRICATOR*, *fâb'-rè-kâ-ûr. n. s.* One who builds, constructs, or frames. *Hovell.*

FABRICK, *fâb'-rik, or fâb'-rik. n. s.* [*fabrica, Lat.*] A building; an edifice. *Wotton.* Any system or compages of matter. *Prior.*

F The *a* in this word seems floating between long and short quantity, as it was in the Latin *fabrica*. I have, like Mr. Sheridan, made it short; for, though Latin words of two syllables, when adopted into English, always have the accent on the first, and the vowel generally long, as *basis, focus, quota, &c.*; yet, when words of three syllables in Latin, with but one consonant in the middle, are anglicised by reducing them to two syllables; as the penultimate in such Latin words is generally short, and the accent of consequence antepenultimate, so the first vowel in the English word is generally short, from the shortening power of the antepenultimate accent in our pronunciation of the Latin word from which it is derived. Thus the Latin *mimicus*, reduced to the English *mimick*, has the first vowel short, though long in Latin, because we make it short in our pronunciation of Latin: the same may be observed of the words *florid, vivid, and livid*, from the Latin *floridus, vividus, and lividus*. Thus, though *fabrica* might have the first vowel long in Latin, yet, as we always pronounce

it short in the English pronunciation of that language, so, when it is reduced to the English *fabrick*, it seems agreeable to this usage to make the first syllable short.

Authority seems, likewise, to favour this pronunciation; for Mr. Sheridan, Mr. Elphinston, Mr. Nares, Mr. Scott, Mr. Perry, and, as far as we can judge by the position of the accent, Bailey, are for the *a* short; and Buchanan, W. Johnston, and, if we can guess by accent, Dr. Ash and Entick, for the long *a*.—See *Principles*, No. 544. *W.*

- ☞ Dr. Johnson has placed the accent on the last syllable both of this word and *joyous*; in which he is consistent, but contrary both to custom and to English analogy. Mr. Sheridan places the accent on the first syllable of *joyous*, and on the last of this word. The reasons are the same for accenting both; they both come from the Latin *facundus* and *joyundus*; and there is scarcely a more invariable rule in our language, than that of removing the accent higher when we adopt a word from the Latin, and abridge it of its latter syllables.—See **ACADEMY.** *W.*

✂ This word, by the parsimony of printers, is often spelt without the *e*. They may allege, that spelling the word with *e* makes it liable to be pronounced in three syllables, by those who do not know the composition of the word; and it may be answered, that spelling it without the *e* makes it liable to a mispronunciation, by joining the *s* and *h* together. If therefore, the composition must be understood before the word can be pronounced with security, let it, at least, be presented to the eye, and the chance of a mistake will be less.—See HOUSEHOLD and HOGSHEAD. *W.*

☞ To all these different pronunciations is this word subject. The accentuation, either on the first or last syllable, depends much on the rhythm of the sentence.—See **COMMODORE** and **COMMONWEALTH**.

When it is used as a substantive, without an adjective before it, the accent is generally on the first syllable; as,

"See how the morning opes her golden gates,
"And takes her *farewell* of the glorious sun."
Shakspeare.

Or if the adjective follow the substantive, as,
"If chance the radiant sun with *farewell* sweet,
"Extend his ev'ning beam, the fields revive,
"The birds their notes renew, and bleating herds
"Attest their joy, that hill and valley ring."
Milton.

But, if the adjective precede the substantive, the accent is generally placed on the last syllable; as,

"Treading the path to nobler ends,
"A long *farewell* to love I gave."
Waller.

As in this grove I took my last *farewell*."
Dryden.

Or when it is governed by a verb, as, "I bade him *farewell*," or, "I bade *farewell* to him."

When it is used as an adjective, the accent is always on the first syllable; as, "A *farewell* sermon."

But when it is used as an interjection, (for, with great deference to Dr. Johnson, I cannot think it an adverb,) the accent is either on the first or second syllable, as the rhythm of pronunciation seems to require.

"But *farewell*, king; sitth thou wilt appear,
"Freedom lives hence, and banishment is here."
Shakspeare.

—"O queen, *farewell*; be still possesst
"Of dear remembrance, blessing still and blest."
Pope.

With respect to the pronunciation of *a* in the first syllable of this word, Mr. Sheridan says, that in Ireland like *fare*. But, if this be really the case, the two nations seem to have changed dialects; for nothing can be more evident, to the most superficial observer, than the tendency in Ireland to pronounce the *a* like that in *far*, and in England like that in *fare*. Not that I think the pronunciation of the first syllable of *farewell*, like *far*, either vicious or vulgar: I am convinced many good speakers so pronounce it; but the other pronunciation I think the more eligible, as well as more general. Dr. Kenrick and Mr. Scott pronounce it with the second sound of *a*, and W. Johnston and Mr. Perry with the first. *W.*

Dr. Johnson tells us, that the *l* in this word is sometimes sounded and sometimes mute, and that, in conversation, it is generally suppressed. To this Dr. Kenrick adds, that it is needlessly suppressed. None of our lexicographers have marked this letter mute but Mr. Sheridan. Mr. Nares says, the word is pronounced both ways, and leaves it undetermined; but Mr. Elphinstone decides positively against retaining the *l*, even in writing. His reasons are, that, as the French have left out the *l* in their antiquated *faulte*, we ought to leave it out in our English word, which was derived from their ancient one. This reasoning, however, I think, is not conclusive. If, after deriving words from the living languages, and using them for centuries, we were to alter them as the parent language happens to alter, our own language would have no stability. The truth is, the French language is much more altered within the last two centuries than the English, and is greatly enfeebled by dropping its consonants. Its nasal vowels, too, have added to its weakness, by rendering both vowels and consonants less distinct. The *l* in question has nothing harsh or uncommon in its sound, and, if it were mute, would desert its relation to the Latin *falsitas*, and form a disgraceful exception; and, if poets have sometimes dismissed it, to rhyme the word with *thought*, *sought*, &c., they have as readily admitted it to rhyme with *malt*, *salt*, and *assault*.

Which of our thrum-capp'd ancestors found fault,
For want of sugar-tongs, or spoons for salt?—*King. W.*

Ob. T.
FE'ALTY, fê'-âl-tê. *n. s.* [*fealty*, old Fr.; *feaultê*, Fr.] Duty due to a superior lord; fidelity to a master; loyalty. *Shakespeare*.
Dr. Kenrick, Mr. Sheridan, Mr. Scott, Buchanan, W. Johnston, and, if we may judge by the position of the accent, Entick, make only two syllables of this word; Mr. Perry, Mr. Nares, and, by the position of the accent, Dr. Ash, three. I do not hesitate a moment to pronounce the last division the best; not only as it is immediately derived from a French word of three syllables, *feaultê*, but as this is generally its quantity in Milton and Shakespeare:
 "I am in parliament pledge for his truth,
 "And last'ng *fealty* to the new-made king."
Shakespeare.
 "— Let my sovereign
 "Command my eldest son, nay, all my sons,
 "As pledges of my *fealty* and love."—*Shakespeare*.
 "— Man, disobeying,
 "Disloyal, breaks his *fealty*, and sins
 "Against the high supremacy of heaven."—*Milton*.
 "— Each bird and beast behold
 "After their kinds: I bring them to receive

"From thee their names, and pay thee *fealty*
 "With low subjection."—*Milton*.
 "Whether his first design be to withdraw
 "Our *fealty* to God, or to disturb
 "Conjugal love."—*Milton*.
 In these quotations from Johnson we see the first only makes *fealty* two syllables; and even here it may be presumed there is a poetical license exactly like that which Young uses in the word *really*:
 "Why, *really*, sixty-five is somewhat old." *W.*

To FE/OFF δ , fêl. 256. *v. a.* [feoffer, old Fr.] To put in possession; to invest with right. *Bp. Hall.*

§ I had always supposed, that the diphthong in this word, and its compound *enfeoff*, was pronounced like the long open *e*; but, upon inquiry into its actual pronunciation by the gentlemen of the law, found I had been in an error; and, though Mr. Sheridan and Mr. Scott mark *feoff* with the short *e*, they are in the same error respecting *enfeoff*, which they mark with the long *e*. Dr. Kenrick and Mr. Barclay are under the same mistake in *feoff*, by pronouncing the diphthong long; and Mr. Nares is wrong also in pronouncing *enfeoff* in the same manner. Mr. Perry is the only one who is right in pronouncing the diphthong short in both. So much, however, had my ear been used to the long sound of this diphthong, that it escaped me in the words *enfeoff* and *enfeoffment*; which, to be consistent, I ought certainly to have marked with the short sound, as in *feoff* and *feoffee*. *W.*

f. When can arise the different quantity of the *e* in *fetus* and *fetid*? Till a better reason appear, let us suppose the following: *fetus*, except the diphthong, retains its Latin form, and therefore is naturally pronounced with its first syllable long: *fetid* is anglicised; and, as most of these anglicised words of two syllables are derived from Latin words of three, where the first, be it short or long, is in our English-Latin pronounced short, the same syllable in the English words is generally short likewise. This has established something like a rule; and this rule has shortened the first syllable of *fetid*, though long in the Latin *fœtidus*.—See **DRAMA. W.**

✚ The first mode of pronouncing this word is the most general; the second is heard chiefly on the stage. Actors, who have such continual occasion to express the passions, feel a propriety in giving a short vowel sound to a word denoting a rapid and violent emotion; and therefore, though this pronunciation may be said to be grammatically improper, it is philosophically right.—See *CHEERFUL*. *W.*

PIERCELY, fêerse'-lè, or fêrse'-lè. *ad.* Violently furiously. *Bacon*.

PIERCEDMINDED*, fêerse'-mind-êd. *a.* Vehement in rage; eager of mischief. 2 *Macc. vi. 18.* *Bp. Wilson's Bible*.

A statue; an image; something formed in resemblance of somewhat else. *Addison*. Representations in painting. *Dryden*. Arrangement; disposition; modification. *Watts*. A character denoting a number. *Shak.* The horoscope; the diagram of the aspect of the astrological houses. *Shak.* [In theology.] Type; representative. *Romans*, v. [In rhetoric.] Any mode of speaking in which words are detorted from their literal and primitive sense. In strict acceptance, the change of a word is a *trope*, and any affection of a sentence a *figure*; but they are confounded even by the exactest writers. *Locke*. [In grammar.] Any deviation from the rules of analogy or syntax.

There is a coarse and a delicate pronunciation of this word and its compounds. The first is such a pronunciation as makes the *u* short and shut, as if written *figgur*: the last preserves the sound of *u* open, as if *y*

were prefixed, *fig-yure*. That this is the true sound of open *u*, see *Principles*, No. 8. *W*

Some speakers, and those not vulgar ones, pronounce the *e*, in the first syllable of this and the following words, when the accent is on it, short; as if written *frêch-ense*, *frêch-ently*, &c. They have undoubtedly the short *e* in the Latin *frequens* to plead; and the Latin quantity is often found to operate in anglicised words of two syllables, with the accent on the first: but usage, in these words, seems decidedly against this pronunciation. Mr. Sheridan, Dr. Kenrick, Mr. Elphinston, Mr. Scott, Mr. Perry, Mr. Smith, W. Johnston, and, if we may judge by the position of the accent, Dr. Ash and Entick, are for the *e* long in the first syllable; and Buchanan, only, marks it with the short *e*. The verb *to frequent*, having the accent on the second syllable, is under a different predicament.—See *DRA-MAT. W.*

3 It is much to be regretted, that the second sound of this word is grown much more frequent than the first. It is not easy to guess at the cause of this unmeaning deviation from the general rule; but the effect is, to impoverish the sound of the language, and to add to its irregularities. It has not, however, like some other words, irrevocably lost its true pronunciation. Rhyme still claims its right to the long open o, as in *bold*, *cold*, *fold*, &c.

"Judges and senates have been bought for gold;

"Esteem and love were never to be sold."

"Now Europe's laurels on their brows behold,

"But stained with blood, or ill exchanged for gold."

Pope.

And solemn speaking, particularly the language of Scripture, indispensably requires the same sound.

With these established authorities in its favour, it is a disgrace to the language to suffer indolence and vul-

- garity to corrupt it into the second sound.—See *WIND*. But, since it is generally corrupted, we ought to keep this corruption from spreading, by confining it, as much as possible, to familiar objects and familiar occasions; thus *goldbeater*, *goldfinch*, *goldfinder*, *golding*, and *goldsmith*, especially when a proper name, as, *Dr. Goldsmith*, may admit of the second sound of *o*, but not *golden*, as the *golden age*. *W.*

GROCER δ , grò'-súr. 98. *n. s.* [from *gross*, a large quantity.] A man who buys and sells tea, sugar, and plums and spices. *Watts.*

Mr. Nares observes, that this word ought to be written *grosser*, as originally being one who dealt by the *gross* or wholesale. There is not, however, he observes, much chance that *grocer* will give place to *grosser*; especially, as they no longer engross merchandise of all kinds, nor insist upon dealing in the *gross* alone. The other derivation of this word, from *grossus*, a fig, is not worth notice. *W.*

GROCERY, grò'-súr-è. *n. s.* Grocers' ware, such as tea, sugar, raisins, spice. *Clarendon.*

GROG*, gróg. *n. s.* [in the language of seamen.] Gin and water, or any spirit and water. *Cook.*

GROSS δ , gròse. 162. *a.* [*gros*, Fr. *grosso*, Ital.] Thick; bulky. *Shak.* Shameful; unseemly; enormous. *Hooker.* Intellectually coarse; palpable; impure; unrefined. *Shak.* Inelegant; disproportionate in bulk. *Thomson.* Dense; not refined; not pure. *Bacon.* Stupid; dull. *Milton.* Coarse; rough; not delicate. *Wotton.* Thick; fat; bulky. *Fell.* Whole; having no deduction or abatement; as, the *gross* sum. Large; aggregate. *Milton.* Heavy; oppressive. *Dryden.*

This word is irregular from a vanity of imitating the French. In Scotland, they pronounce this word regu-

larly, so as to rhyme with *moss*. Pope also rhymes it with this word.

"Shall only man be taken in the gross?"

"Grant but as many sorts of minds as moss."

This, however, must be looked upon as a poetical license; for the sound seems now irrevocably fixed as it is marked, rhyming with *jocose*, *verbosc*, &c. *W.*

GROSS, gròse. *n. s.* The main body; the main force. *Addison.* The bulk; the whole not divided into its several parts. *Hooker.* Not individual; but a body together. *Shak.* The chief part; the main mass. *Bacon.* The number of twelve dozen [*grosse*, Fr.] *Locke.*

GUILT ſ, gŭlt. 341. *n. s.* [*gylt*, Sax.] The state of a man justly charged with a crime. *Bacon.* A crime; an offence. *Shakespeare.*

It is observed in *Principles*, No. 92, that, when *g* comes before short *a*, the sound of *e* so necessarily intervenes, that we cannot pronounce these letters without it; but that, when the *a* is long, as in *regard*, we may pronounce these two letters without the intervention of *e*, but that this pronunciation is not the most elegant.—The same may be observed of the *g* hard, and the long and short *i*. We may pronounce *guide* and *guile* nearly as if written *egg-ide* and *egg-ile*, though not so properly as *egg-yide* and *egg-yile*; but *guild* and

guilt must necessarily admit of the *e* sound between hard *g* and *i*, or we cannot pronounce them. *W.*

GYMNA/STICK, jîm-nâs'-tîk. *a.* [γυμναστικός.] Pertaining to athletick exercises. *Grew.*

GY In this word and its relatives we not unfrequently hear the *g* hard, as in *gimlet*, for this learned reason, because they are derived from the Greek. For the very same reason we ought to pronounce the *g* in *Genesis*, *geography*, *geometry*, and a thousand other words, hard, which would essentially alter the sound of our language. Mr. Sheridan has very properly given the soft *g* to these words; and Mr. Nares is of the same opinion with respect to the propriety of this pronunciation, but doubts of the usage; there can be no doubt, however, of the absurdity of this usage, and of the necessity of curbing it as much as possible.—See *Principles*, No. 350. *W.*

GYMNA/STICK*, jîm-nâs'-tîk. *n. s.* Athletick exercise. *Arbutnot.* A teacher of the wrestling science. *Locke.*

GYVE *ô*, jîve. *n. s.* [gwyvyn, Welsh.] A fetter; a chain for the legs. *Shakspeare.*

GY Mr. Sheridan and Mr. Scott make the *g* in this word hard; but Mr. Elphinston, Dr. Kenrick, and Mr. Perry, with more propriety, make it soft, as I have marked it. Mr. Nares makes the sound doubtful; but this majority of authorities, and agreeableness to analogy, have removed my doubts, and made me alter my former opinion. *W.*

To **GYVE**, jîve. *v. a.* To fetter; to shackle. *Shakspeare.*

HAB

H Is, in English, as in other languages, a note of aspiration, sounded only by a strong emission of the breath, without any conformation of the organs of speech, and is therefore, by many grammarians, accounted no letter. The *h* in English is scarcely ever mute at the beginning of a word, as *house*. The strong emission of the breath is usually withheld from *heir*, *herb*, *hostler*, *honest*, *honour*, *humour*; and perhaps from *hospital* and *hour*; and by some from *humble*. 394.

HAUGHT, hâw. *n. s.* A little meadow lying in a
valley. See *Haw*.

⚡ This word, though for ages obsolete, or heard only in
the proper names of *Fetherstonehaugh*, *Philiphaugh*,
&c., seems to have risen from the dead in the late
whimsical deception we meet with in some gardens,
where we are suddenly stopped by a deep valley wholly
imperceptible till we come to the edge of it. The ex-
pression of surprise, *Hah! hah!* which generally
breaks out upon a discovery of this deception, is com-
monly supposed to be the origin of this word; but the
old word, *haugh*, is so nearly related to the signifi-
cation of the new term, *haw*, *hew*, that it seems much the
more natural parent of it. *W*.

HAUGHT ð, hâwt. *a.* [*halt*, *haul*, old *Fr.*] Haughty;

⚡ This word was in quiet possession of its true sound
till a late dramatick piece made its appearance, which,
to the surprise of those who had heard the language
spoken half a century, was, by some speakers, called

—nò, mòve, nòr, nòt; —tùbe, túb, báll; —ðíl; —pòánd; —thín, THIS.

the *Haunted Toper*. This was certainly the improvement of some critic in the language; for a plain common speaker would undoubtedly have pronounced the *as* as in *aunt, javant*, &c., and as it had always been pronounced in the *Drummer*, or the *Haunted House*. That this pronunciation is agreeable to analogy, see *Principles*, No. 214. *W.*

HE/GIRA, hê-jî-râ, or hêd'-jê-râ. *n. s.* [Arabick.] A term in chronology, signifying the epocha, or account of time, used by the Arabians, who begin from the day that Mahomet was forced to make his escape from Mecca, July 16, A. D. 622. *Harris.*

☞ The latter pronunciation is adopted by Dr. Johnson, Barclay, and Bailey; and the former by Mr. Sheridan, Dr. Ash, Mr. Scott, and Mr. Perry. The latter, I am informed, is the pronunciation of Oriental scholars; but the former is not only more agreeable to the ear, but seems to fall in with those Arabick-Spanish names, *Ramirez, Almira*, &c., as well as the Grecian, *Tauchira, Thyatira, Dejanira*, &c. *W.*

HE/IFER, hêf'-ûr. 98, 254. *n. s.* [heapope, Sax.] A young cow. *Bacon.*

HEIGH-HO, hý-hó. *interj.* An expression of slight languor and uneasiness. *Shak.* A voice of exultation. *Dryden*

HEIGHT §, hîte, or hâte. 253. *n. s.* [heðe, Sax.] Elevation above the ground: indefinite. *Milton.* Altitude; space measured upwards. *Donne.* Degree of latitude. *Abbot.* Summit; ascent; towering eminence; high place. *Dryden.* Elevation of rank; station of dignity. *Shak.* The utmost degree; full completion. *Bacon.* Utmost exertion. *Shak.* State of excellence; advance towards perfection. *Addison.*

☞ The first of these modes is the most general; and the last, the most agreeable to the spelling. *Milton* was the patron of the first, and, in his zeal for analogy, as Dr. Johnson says, spelt the word *highth*. This is still the pronunciation of the vulgar, and seems, at first sight, the most agreeable to analogy; but, though the sound of the adjective *high* is generally preserved in the abstract *height*, the *h* is always placed before the *t*, and is perfectly mute. Mr. Garrick's pronunciation (and which is certainly the best) was *hite*.—See **DROUGHT**. *W.*

To HE/IGHTEN, hî'-tn. 103. *v. a.* To raise high. *Shak.* To improve; to meliorate. *Addison.* To aggravate. *Addison.* To improve by decorations. **HE/IGHTENING***, hî'-tn-ing. *n. s.* Improvement by decorations. *Dryden.*

HE/INOUS §, hà'-nûs. 249. *a.* [haineux, Fr.] Atrocious; wicked in a high degree. *Hooker.*

☞ Mr. Sheridan gives the long sound of *e* to the first syllable of this word, contrary to every dictionary, to analogy, and, I think, the best usage; which, if I am not mistaken, always gives the first syllable of this word the sound of slender *a*. That this was the sound of this syllable formerly, we may gather from the spelling of it: for, in Charles the Second's time, Mr. Baxter is accused by Mr. Danvers of publishing the *hainous* charge against the Baptists of baptizing naked. *W.*

HE/INOUSLY, hà'-nûs-lè. *ad.* Atrociously; wickedly. *Bp. Hall.*

HE/INOUSNESS, hà'-nûs-nês. *n. s.* Atrociousness; wickedness. *Rogers.*

HEIR §, âre. 249, 394. *n. s.* [heir, old Fr. haeres, Lat.] One that is inheritor of any thing after the present possessor. *Locke.* One newly inheriting an estate. *Swift.*—*Heir apparent.* He, who, if he survives, will certainly inherit after the present possessor. *Heir presumptive.* One, who, if the ancestor should die immediately, would, in the present state of things, be his heir; but whose inheritance may be defeated by the contingency of some nearer heir being born.

To HEIR, âre. *v. a.* To inherit. *Dryden.*

HE/IRDOM*, âre'-dôm. *n. s.* The state of an heir. *Bp. Hall.*

HE/IRESS, âre'-îs. 99. *n. s.* A woman that inherits. *Waller.*

HE'TEROCLITE δ, hêt'-êr-ô-klîte. 156. *n. s.* [*heteroclitum*, Lat.] Such nouns as vary from the common forms of declension. *Clarke*. Any thing or person deviating from the common rule. *Burton*.

Mr. Sheridan, Dr. Kenrick, Dr. Ash, Mr. Perry, Buchanan, Barclay, and Bailey, unite in placing the accent on the first syllable of this word: Entick alone places it on the third. Mr. Sheridan and Buchanan place an accent also on the last syllable, and make the *i* long; while Dr. Kenrick and Mr. Perry make it short. That the accent ought to be on the first syllable, cannot be doubted, when we consider how uniformly we remove the accent higher when we anglicise Latin words by shortening them: and though the *i* in these terminations is rather ambiguous, 156, it certainly inclines to the long sound, which Mr. Sheridan and Buchanan have given it. —See *ACADEMY* and *INCOMPARABLE*. *W.*

HE'TEROCLITE*, hêt'-ê-rô-klîte. *a.* Denoting nouns varying from the common forms of declension. *Watts*. Deviating from common rules; singular. *Orerrey*.

HETEROCLITICAL, hêt'-êr-ô-klîf'-ê-kâl. *a.* Deviating from the common rule. *Brown*.

HE'TERODOXY*, hêt'-ê-rô-dôk-sê. *n. s.* The quality of being heterodox. *Bp. Bull*.

HE'TEROGENE δ*, hêt'-ê-rô-jêne. *a.* [*ἑτερος* and *γένος*] Not of the same kind; dissimilar. *B. Johnson*.

HETEROGE'NEAL, hêt'-êr-ô-jê'-nê-âl. *a.* Not of the same nature, not kindred. *Bacon*.

HETEROGENE'ITY, hêt'-êr-ô-jê-nê'-ê-tê. *n. s.* Opposition of nature; contrariety or dissimilitude of qualities. Opposite or dissimilar part. *Boyle*.

HETEROGE'NEOUS, hêt'-êr-ô-jê'-nê-ûs. *a.* Not kindred; opposite or dissimilar in nature. *Wallis*.

There is an affected pronunciation of this and the two preceding words, which, contrary to our own analogy, preserves the *g* hard. The plea is, that these words are derived from the Greek, which always preserved the *gamma* hard. To produce this reason is to expose it. What would become of our language, if every word from the Greek and Latin, that had *g* in it, were so pronounced? What is most to be regretted is, that men of learning sometimes join in these pedantic deviations, which are only worthy of the lowest order of critical coxcombs. —See *GYMNASTICK*. *W.*

HETEROGE'NEOUSNESS*, hêt'-êr-ô-jê'-nê-ûs-nêss. *n. s.* Dissimilitude in nature; contrariety of parts. *Ash*.

HETERO'SCIAN δ*, hêt'-ê-rôsh'-ê-ân. *a.* [*ἑτερος* and *σκία*] Having the shadow only one way. *Gregory*.

HVCCOUGH *ξ, hîk'-kûp, or hîk'-kôf. n. s.* [hicka, S. Goth.] A convulsion of the stomach producing sobs. *Wiseman.*

✚ This is one of those words which seems to have been corrupted by a landable intention of bringing it nearer to its original. The convulsive sob was supposed to be a species of cough; but neither Junius nor Skinner mention any such derivation, and both suppose it formed from the sound it occasions. Accordingly we find, though *hicough* is the most general orthography, *hicup* is the most usual pronunciation. Thus Butler:—

"Quoth he, to bid me not to love

"Is to forbid my pulse to move,

"My beard to grow, my ears to prick up,

"Or, when I'm in a fit to hiccup." *W*

TO HVCCOUGH, *hîk'-kûp. v. n.* To sob with convulsion of the stomach.

Hog-shed. This word is sometimes pronounced as if written *hog-shed*: if Dr. Johnson's derivation of this word from *hog* and *head* be a true one, this pronunciation is certainly wrong, and arises from the junction of the letters *s* and *h*, in printing, which may be presumed to have occasioned a similar mispronunciation in *household* and *falsehood*, which see. Junius derives this word from the Belgick *ockshood*, *ogshood*, or *hockshoot*. Min-

show, says Skinner, derives it from *oockshood* and *ogshood*; but he himself is of opinion, that it rather comes from the Latin *orca*, a great sea-fish, an enemy to the whale, and the Belgick *hoofd*, as much as to say, *ork's hoof*; that is, *orca caput*, an *ork's head*. *W.*

HORIZON, hò-rî-zôn. 503. n. s. [*ὁρίζων*.] The line that terminates the view. The *horizon* is distinguished into sensible and real: the sensible *horizon* is the circular line which limits the view; the real is that which would bound it, if it could take in the hemisphere. *Bacon.*

✠ This word was, till of late years, universally pronounced, in prose, with the accent on the first syllable and *Shakespeare*, says Dr. Johnson, has improperly placed it so in verse:

—“When the morning sun shall raise his car
“Above the borders of this *horizon*,
“We'll forward towards Warwick and his mates.”

With respect to the propriety of this pronunciation, it may be observed, that there is scarcely any thing more agreeable to the genuine analogy of English orthoëpy, than placing the accent on the first syllable of a trisyllable, when the middle syllable does not end with a consonant, 503. But another rule almost as constantly counteracts this analogy: when the word is perfectly Latin or Greek, and the accent is on the penultimate, then we generally follow the accentuation of those languages. Poets have so universally placed the accent on the second syllable of this word, and this pronunciation has so classical an air, as to render the other accentuation vulgar. *W.*

HORIZONTAL, hòr-è-zôn'-tâl. a. Near the horizon. *Milton.* Parallel to the horizon; on a level. *Brown.*

HORIZONTALLY, hòr-è-zôn'-tâl-è. ad. In a direction parallel to the horizon. *Brown.*

HYMENE'AL, hl-mè-nè'-âl. } a. Pertaining to mar-
HYMENE'AN, hl-mè-nè'-ân. } riage. *Pope*.

¶ In these compounds of *Hymen*, Mr. Sheridan has shortened the *i* in the first syllable; but, though I think this tendency of the secondary accent to shorten the vowel perfectly agreeable to analogy, yet *y* has so frequently the sound of long *i*, that it seems, in this case and some others, to counteract that tendency; nor can any other reason be given why the same letter in *hyperbotical* and *hypercritical* should be long, as Mr. Sheridan has properly marked them. Dr. Kenrick, Mr. Buchanan, and Mr. Perry, by their notation, seem of the same opinion. *W.*

HYMN⁹, hîm. *n. s.* [hûmos.] An encomiastick song, or song of adoration to some superiour being. *Spenser*.

To HÛMN, hîm. *v. a.* [hûmew.] To praise in song; to worship with hymns. *Milton*.

To HYMN, hîm. *v. n.* To sing songs of adoration. *Milton*.

HYMNICK, hîm'-nîk. *a.* Relating to hymns. *Donne*.

HYMNING, hîm'-ning. 411. *part. a.* Celebrating in hymns.

HYMNOLOGY*, hîm-nôl'-ô-jè. *n. s.* [hûmos and λόγος.] A collection of hymns. *Meade*.

To HYP, hîp. *v. a.* [barbarously contracted from *hypochondriack*.] To make melancholy; to dispirit. *Spectator*.

HYPALLAG, hè-pâl'-lâ-jè. *n. s.* [επαλλαγή.] A figure by which words change their cases with each other.

HYPER*, hî'-pûr. *n. s.* [ὑπερ.] A word often found in composition, in our language, usually signifying excess, or something beyond the meaning of the simple word to which it is joined.

HYPER, hî'-pûr. *n. s.* [curtailed from *hypercritical*.] A hypercritical. *Prior*.

HYPERA'PST*, hî-pûr-râs'-pîst. *n. s.* [ὑπεραπίζω.] A defender. *Chillingworth*.

HYPERBATON*, hî-pêr'-bâ-tôn. *n. s.* [Lat. from *επερβαίνω*.] A figure in writing, when the words are transposed from the plain grammatical order. *Milton*.

HYPERBOLA⁹, hî-pêr'-bô-lâ. 187. *n. s.* [ὑπερ and βάλλω.] A section of a cone made by a plane, so that the axis of the section inclines to the opposite leg of the cone, which in the parabola is parallel to it, and in the ellipsis intersects it. *Harris*.

HYPERBOLE, hî-pêr'-bô-lè. 187. *n. s.* [ὑπερβολή.] A figure in rhetoric by which any thing is increased or diminished beyond the exact truth: as, *He runs faster than lightning; His possessions are fallen to dust.* *Shakspeare*.

¶ None of our orthoëpists but Dr. Johnson accent this word on the first syllable: but that he should do so is the more surprising, as all his poetical authorities adopt a different pronunciation:

“*Hyperboles*, so daring and so bold,

“Disdaining bounds, are yet by rules controlled.”

Granville. W.

HYPERBO' LICAL, hî-pêr-bôl'-lè-kâl. } *a.* [from
HYPERBO' LICK, hî-pêr-bôl'-îk. } *hyperbola*.]

Belonging to the hyperbola; having the nature of an hyperbola. *Grew*. [From *hyperbole*.] Exaggerating or extenuating beyond fact. *Burton*.

HYPOSTATICALLY*, hi-pôs-tât'-ê-kâl-lê, a. Personal-ly. *More*.

HYPO/TENUSE, hi-pôt'-ê-nôse. 187. n. s. {*hypo-*
tenoua.] The line that subtends the right angle of
a right-angled triangle; the subtense. *Locke*.

Mr. Sheridan and Dr. Ash [and Mr. Todd] accent
this word on the second syllable; but Dr. Johnson, Dr.
Kenrick, Mr. Barclay, Bailey, and Buchanan, on the
last. These authorities induced me, in the first edition
of this [Walker's] Dictionary, to place the accent on
the last syllable; but, upon further inquiry, I found
the best usage decidedly in favour of the antepenulti-
mate accent; and as the secondary accent is on the
second syllable of the Latin *hypotenusa*, this accentua-
tion seems most agreeable to analogy.—See **ACADE-**
MY and **INCOMPARABLE**. *W*.

To HYPOTHECATE*, hi-pôth'-ê-kâte. v. a. [*hy-*
potheca, Lat.] To pawn; to give in pledge. *Burke*.

HY/SSTOP, hîz'-zûp, or hî'-sûp. n. s. [*hyssopus*, Fr.]
A verticillate plant. *Miller*.

Mr. Sheridan, Mr. Scott, Mr. Entick, W. Johnston,
and Buchanan, pronounce this word in the second man-
ner; Dr. Kenrick, Dr. Ash, and Mr. Perry, in the first.
To pronounce the *y* long before double *s*, is contrary to
every rule in spelling; and therefore, if the first mode
be not the best, the orthography ought necessarily to
be changed. *W*.

HYSTERICAL, hîs-têr'-rê-kâl. } a. [*hysterikos*.]

HYSTERICK, hîs-têr'-rîk. 509. } Troubled with

when that is last said, which was first done.
Peachment.

HYTHE*, hîthe. n. s. A port. See **HITHÉ**.

ICH

I Is in English considered both as a vowel and
consonant. [For *I* consonant, see *J*.]

I vowel has a long sound, as *fine*, *thine*, which
is usually marked by an *e* final; and a short
sound, as *fin*, *thin*. Prefixed to *e*, it makes a diphthong
of the same sound with the soft *i*, or double
e, *ee*: thus *field*, *yield*, are spoken as *feeld*, *yeeld*;
except *friend*, which is spoken *frenl*. Subjoined to
a or *e*, it makes them long, as *faul*, *neigh*; and to
o, makes a mingled sound, which approaches to the
notion of a diphthong, as *oil*, *coin*. The sound of *i*
before another *i*, and at the end of a word, is always
expressed by *y*. [See *Principles*, No. 8, 105, 185.]

I, *i* pronoun personal. [*ik*, Goth. *ic*, Sax.] *I*, gen.
&c. *me*; plural, *we*, gen. &c. *us*. The pronoun of
the first person, *myself*. *Gen. xxxix*. *I* is sometimes
written for *ay*, or *yes*. *Shakspeare*. *I*, prefixed to a
word, is common in our old language, as well
as *y*: as, *ibrought*, *ibuilt*, *ybuilt*.

It may be remarked, that the frequent use of this let-
ter, in our old dramatick writers, instead of *ay*, is a proof
that our ancestors pronounced *i* much broader than we
do at present, and somewhat approaching to the sound
it has at this day in the north of England.—See *Direc-*
tions to Foreigners, prefixed to this Dictionary. *W*.

IAMBICK, i-lâm'-bîk. n. s. [*iambicus*, Lat.] Verses

IMBE'CILE, ím-bés'-síl, or ím-bè-sèl'. 140, 112. *a.* [imbecilis, Lat.] Weak; feeble; wanting strength

of either mind or body. *Barrow.*

Dr. Johnson, Dr. Ash, Dr. Kenrick, and Entick, accent this word on the second syllable, as in the Latin *imbecilis*; but Mr. Scott and Mr. Sheridan on the last, as in the French *imbecile*. The latter is, in my opinion, the more fashionable, but the former more analogical. We have too many of these French-sounding words; and if the number cannot be diminished, they should, at least, not be suffered to increase.

This word, says Dr. Johnson, is corruptly written *imbecile*. This corruption, however, is too well established to be altered; and as it is appropriated to a particular species of deficiency, the corruption is less to be regretted. *W.*

⚡ The second syllable of this and the foregoing word is frequently pronounced as in the verb to *import*. The best usage, however, is on the side of the first pronunciation, which seems to suppose, that it is not a word formed from *import*, but an adoption of the French *importance*, and therefore it ought not to be pronounced as a compound, but as a simple. The authorities for this pronunciation are, Mr. Sheridan, Dr. Kenrick, Dr. Ash, W. Johnston, Mr. Perry, and Mr. Buchanan. Mr. Scott is for either, but gives the first the preference. *W.*

IMPO'RTANTLY*, ìm-pòr'-tânt-lè. ad. Weightily; forcibly. *Hammond.*

Notwithstanding the clear analogy there is for pronouncing this word in the manner it is marked, there is a repugnance at leaving out the *g*, which nothing but frequent use will take away. If *sign* were in as little use as *impugn*, we should feel the same repugnance at pronouncing it in the manner we do. But, as language is association, no wonder association should have such power over it.—For the analogies that lead us to this pronunciation, see *Principles*, No. 385.

Mr. Sheridan, Mr. Nares, and Mr. Scott, pronounce the word as I have marked it; that is, with the *g* silent, and the *u* long; but Dr. Kenrick, Mr. Perry, and Buchanan, though they suppress the *g*, pronounce the *u* short. That this short sound is contrary to analogy cannot be doubted, when we take a view of the words of this termination; and the only plea for it is, the short sound of the vowels before *gn* in *phlegm*, *diaphragm*, *parapegm*, *apophthegm*, and *paradigm*, 389; but as the accent is not on any of these syllables, except *phlegm*, which is irregular, 389, it is no wonder the vowel should shorten in these words, as it so frequently does in the numerous terminations in *ile*, *ine*, *ite*, &c. 147. *W*.

IMPUGNATION*, ïm-pûg-nâ'-shûn. *n. s.* Opposition; resistance. *Bp. Hall*.

IMPUGNER, ïm-pû-nôr. *n. s.* One that attacks or invades. *Fulke*.

In judging of the propriety of this pronunciation, we must not confound the participles *impugning*, *impugned*, and the verbal noun *impugner*, with such words as we do not form ourselves, as *repugnant*, *malignant*, &c. The former are mere branches of the verb *impugn*, and therefore make no alteration in the root; the latter we receive already formed from the Latin or the French, and pronounce the *g* as we do in *signify* and

signet, though it is silent in *signed*, *signing*, or *signer*. For it must be carefully observed, that the analogy of pronunciation admits of no alteration in the sound of the verb, upon its being formed into a participle or verbal noun; nor in the sound of the adjective, upon its acquiring a comparative or superlative termination.—See *Principles*, No. 409. *W*.

INCOMPARABLE §, ín-kòm-'pà-rà-bl. *a.* [in and comparable.] Excellent above compare; excellent beyond all competition. *Sidney.*

§ This is among some of the words in our language, whose accentuation astonishes foreigners, and sometimes puzzles natives. What can be the reason, say they, that *comparable* and *incomparable* have not the same accent as the verb *compare*? To which it may be answered:—One reason is, that the English are fond of appearing in the borrowed robes of other languages; and, as *comparable* and *incomparable* may possibly be derived from *comparabilis* and *incomparabilis*, they seem desirous of laying the stress on the first syllable, both to show their affinity to the Latin words, (see *ACADEMY*), and to distinguish them from the homespun words formed from our own verb. When this distinction is once adopted, the mind, which is always labouring to express its ideas distinctly and forcibly, finds a sort of propriety in annexing different ideas to the different accentuation; and thus the distinction becomes accurate and classical. If we may compare small things with great, it may be observed, that the evils of language, like other evils in nature, produce some good. But it may be likewise observed, that producing different meanings by a different accentuation of words, is but a bawling way of promoting the copiousness of languages, and ought, as much as possible, to be discouraged; especially when it adds to the difficulty, and takes away from the harmony, of pronunciation. Besides, there is a petty criticism, which always induces coxcombs in pronunciation to carry these distinctions farther than they ought to go. Not content with accentuating *acceptable*, *admirable*, *commendable*, *comparable*, *lamentable*, &c., on the first syllable, which implies not a mere capacity of being *accepted*, *admirèd*, &c., but a worthiness of being *accepted*, *admirèd*, &c.; *corruptible* and *susceptible* are sometimes accented in this manner, without the least necessity from a differ-

- ence of signification. In short, all these refinements in language, which are difficult to be understood, and productive of perplexity, ought to be considered rather as evils than advantages, and to be restrained within as narrow bounds as possible.—See *BOWL. W.*

INDECOROUS, in-dê-kô-rûs, or in-dêk-ô-rûs. [See DECOROUS.] *a.* [*indecorus*, Lat.] Indecent; unbecoming. *Norris.*

Nothing can show more with what servility we sometimes follow the Latin accentuation than pronouncing this word with the accent on the penultimate. In the Latin *decorus* the *o* is long, and therefore has the accent; but in *dēcorus* the *o* is short, and the accent is consequently removed to the antepenultimate; this alteration of accent obtains likewise when the word is used in English, and this accentuation is perfectly agreeable to our own analogy; but because the Latin adjective *indecorus* has the penultimate long, and con-

sequently the accent on it, we must desert our own analogy, and servilely follow the Latin accentuation, although that accentuation has no regard to analogy! for why *dēdecorus* and *indecorus*, words which have a similar derivation and meaning, should have the penultimate of different quantities, can be resolved into nothing but the caprice of custom; but that so clear an analogy of our own language should be subservient to the capricious usages of the Latin, is a satire upon the good sense and taste of Englishmen. Dr. Ash [*in dēcorus*, *Perry* and *Jones*] is the only one who places the accent on the antepenultimate of this word; but what is his single authority, though with analogy on his side, to a crowd of coxcombs flirting with scraps of Latin! —See *Principles*, No. 512. *W.*

INDISPUTABLE, in-dîs-pû-tâ-bl, or in-dîs-pû-tâ-bl. [See DISPUTABLE.] *a.* [in and disputable.] Uncontrovertible; incontestable. *Addison.*

¶ This word is nearly under the same predicament as disputable. Dr. Johnson, Dr. Ash, Dr. Kenrick, W. Johnston, Mr. Smith, Buchanan, and Bailey, adopt the last accentuation, and only Mr. Sheridan and Entick [also Perry and Jones] the first; and yet my experience and recollection grossly fail me, if this is not the general pronunciation of polite and lettered speakers. Mr. Scott has given both pronunciations; but, by placing this the first, seems to give it the preference.—See IRREPARABLE. *W.*

INDIVISIBLE, in-dê-vîz'-ê-bl. *a.* [in and divisible.] What cannot be broken into parts; so small as that it cannot be smaller. *Digby.*

INDIVISIBLE*, in-dê-vîz'-ê-bl. *n. s.* That which is incapable of division. *More.*

INDIVISIBLY, in-dê-vîz'-ê-blê. *ad.* So as it cannot be divided. *Bp. Hall.*

INDOCIBLE, in-dôs'-ê-bl. 405. *a.* [in and docible.] Un teachable; insusceptible of instruction. *Bp. Hall.*

INDOCILE, in-dôs'-sîl. *a.* [indocilis, Lat.] Un teachable; incapable of being instructed. *Sir W. Petty.*

¶ This word and all its relatives have the *o* so differently pronounced by our best orthoëpists, that the shortest way to show the difference, will be, to exhibit them at one view:

Dôcile. Sheridan, Scott, Buchanan, W. Johnston, Entick, Nares, Smith.

Dôcile. Kenrick, Perry.

Indôcile. Sheridan, Scott, Buchanan, W. Johnston, Perry Entick.

Indôcile.

Dôcible. Sheridan, Scott, Entick.

Dôcible. Kenrick, Perry.

Indôcible. Sheridan, Scott, Buchanan, W. Johnston, Ea tick.

Indôcible. Perry. [*Dôcile, indôcile, indôcible, Jones.*]

We here see the great preponderance of authority for the short sound of *o* in all these words of three syllables, not because this letter is short in the Latin words whence they are derived; for *visibile* and *visible*, which have the *i* short with us, are *visibilis* and *visibilis* in Latin; but because the accent in our English word is antepenultimate, and because this accent has a shortening power in all words of this form, which may be called simple, 503, unless the antepenultimate vowel be *e*, and then it is always long, 509, 511, 537. Thus the antepenultimate vowels in *credibile*, *claricie*, *vesicle*, &c. are short, though derived from *crêdibilis*, *clâricula*, *vesicula*, &c.; but the *a* in *tamable*, *debatable*, &c., is long, because they are formatives of our own, from *tame*, *debate*, &c. *W.*

INDOCILITY, in-dô-sîl'-ê-tê. *n. s.* Un teachable-ness; refusal of instruction. *Bp. Hall.*

§ This word sprung up in the House of Commons about ten years ago, [since 1780] and has since been so much in use as to make us wonder how we did so long without it. It had, indeed, one great recommendation, which was, that it was pronounced in direct opposition to the rules of our own language. An Englishman, who had never heard it pronounced, would, at first sight, have placed the accent on the antepenultimate, and have pronounced the penultimate *i* short; but the vanity of showing its derivation from the Latin *inimicus*, where the penultimate *i* is long, and the very oddity of pronouncing this *i* long in *inimical*, made this pronunciation fashionable. I know it may be urged, that this word, with respect to sound, was as great an oddity in the Latin language as it is in ours; and that the reason for making the *i* long was its derivation from *amicus*. It

—nò, môte, nôr, nôt;—tûbe, tûb, bûll;—ôll;—pôund;—ûin, THIS.

will be said, too, that in other words, such as *aromaticus, tyrannicus, rhetoricus*, &c., the *i* was only terminal; but in *inimicus* it was radical, and therefore entitled to the quantity of its original *amicus*. In answer to this, it may be observed, that this was no reason for placing the accent on that syllable in Latin. In that language, whenever the penultimate syllable was long, whether radical or terminal, it had always the accent on it. Thus the numerous terminations in *alis* and *ator*, by having the penultimate a long, had always the accent on that letter, while the *i* in the terminations *itis* and *itas* seldom had the accent, because that vowel was generally short. But allowing for a moment, that we ought servilely to follow the Latin accent and quantity, in words which we derive from that language, this rule, at least, ought to be restricted to such words as have preserved their Latin form, as *orator, senator, character*, &c.; yet in these words we find the Latin penultimate accent entirely neglected, and the English antepenultimate adopted. But if this Latin accent and quantity should extend to words from the Latin that are anglicised, then we ought to pronounce *divinity, de-vî-ne-ty; severity, se-vê-re-ty; and urbanity, ur-bâne-ty*. In short, the whole language would be metamorphosed, and we should neither pronounce English nor Latin, but a Babylonish dialect between both. *W.*

INTERCALAR §, ñ-têr'-kâlâr. *Ob. a.* [intercalary, Lat.]

INTERCALARY §, ñ-têr'-kâl'-âr-ê. *ris, Lat.* Inserted out of the common order to preserve the equation of time, as the twenty-ninth of February in a leap year is an intercalary day. *Holder.*

§ All our orthoëpists agree in placing the accent on the second syllable of *intercalar* and *intercalate*; and Mr. Sheridan, Dr. Ash, Mr. Perry, Buchanan, Barclay, and Etick, place it on the same syllable in *intercalary*; but Dr. Kenrick, W. Johnston, and Bailey, on the third. This latter pronunciation is certainly more agreeable to the ear; and, as it is derived from the Latin *intercalaris*, a word of the same number of syllables with the penultimate long, it should seem we ought to place the accent on the same syllable in the English word, 503; but, as our language absolutely forbids us to lay the stress on the *a* in this termination, 512, I see no reason why we should not place it on the preceding syllable, especially as the termination is not enclitic, 513, and therefore does not require the accent on the conjunctive part of the word. (See ACADEMY.) The accent on the third syllable, therefore, as it clashes with no analogy and is so much more agreeable to the ear, ought, in my opinion, to be adopted. *W.*

INTERFERENCE*, in-têr-fêr'-rênsê. n. s. Interposition. *Burke*.

§ There is a perfectly new pronunciation of this word, by placing the accent on the second syllable, which, from its singularity, bids fair for a reception among the minor critics in pronunciation, especially when there are, at first sight, a few plausible analogies in its favour. Why, these critics will say, should we not pronounce this word with the accent on the antepenultimate syllable, as well as *conference*, *deference*, *preference*, *inference*, and *circumference*, which, it is evident, are not formed from our verbs to confer, to defer, &c., but from the Latin *conferens*, *deferens*, &c. ? It may be answered, that, as there is no Latin verb *interfero*, there is not the same reason for accenting this word on the antepenultimate syllable, as there is for the other words ; and therefore forming *interference* from our own verb to *interfere*, seems preferable to the forming of a mongrel Latin word, merely to avoid a formative of our own ; especially when we have so many words, in a similar termination, deriving their accent from the verb ; as *defiance*, from *defy* ; *reliance*, from *rely* ; *assurance*, from *assure*, &c., and even in this termination *condulgence*, from *condole* ; and why not *interference*, from *interfere* ? Entick's is the only dictionary in which I have found this very common and useful word. but, as Dr. Johnson has not got it, this omission in other dictionaries is easily accounted for. *W.*

INTERFERING*, in-têr-fêr'-ring. n. s. Clashing ; contradiction ; opposition. *Bp. Butler*.

Mr. Sheridan, Dr. Kenrick, Mr. Nares, Buchanan, W. Johnston, Mr. Perry, and Mr. Barclay, place the accent on the second syllable of this word; and Dr. Johnson, Dr. Ash, Mr. Scott, Bailey, and Entick, on the first. I do not hesitate a moment to pronounce this the better accentuation: for, as this word must be derived from the noun *interstitium*, and not from the verb *intersto*, the rule so often mentioned, of changing the secondary accent of the Latin word, when shortened into the principal accent of the English word, must take place here. —See *ACADEMY* and *INCOMPARABLE*.

It is not easy to conjecture what could be the reason that this majority of orthoëpists should be found on the side of the penultimate accentuation of this word. It is certain that the greater part do but copy from former dictionaries; but when an uncouth and uncommon pronunciation is adopted, it is generally for some learned reason from the dead languages, which the common inspector is utterly incapable of conceiving. In the present instance, however, there is not the shadow of a reason, from the original Latin, that we should place the accent on the second syllable of *intersticia*, which would not oblige us to lay the stress on the same syllable of *interfere*, *intercene*, *intercourse*, *interval*, *superfluous*, &c. *W*.

INTERSTINCTIVE*, *în-têr-sîngk'-dîv*. a. [*interstinctus*, Lat.] Distinguishing. *Wallis*.

INTESTINAL, *în-tês'-tê-nâl*. 88. a. [*intestinal*, Fr.] from *intestine*.] Belonging to the guts. *Arbuthnot*.

This word is sometimes pronounced with the accent on the third syllable, with the *i* long, because the *i* in the Latin *intestinum* is long; but Dr. Johnson makes it more properly a formative of our own from *intestine*; and even if we were to allow this adjective to be derived immediately from the Latin substantive of the same number of syllables, we may see, in *Principles* No. 503, (h), how many exceptions there are to this rule, and how probable it is that this word is one. *W*.

INTE/STINE, *în-tês'-tîn*. 140. a. [*intestinus*, Lat.] Internal; inward; not external. *Duppa*. Contained in the body. *Milton*. Domestic; not foreign. *Shakspeare*.

Mr. Sheridan, Dr. Ash, Mr. Nares, Mr. Scott, W. Johnston, Mr. Perry, Buchanan, Entick, and Bailey, pronounce this word with the accent on the first syllable; and Dr. Johnson, Dr. Kenrick, and Mr. Barclay, on the second. Dr. Kenrick, indeed, tells us, that the accent is sometimes placed on the first; which is, indeed, very apparent from the number of writers I have produced for that accentuation. But the propriety of this pronunciation is not better supported by authority than by analogy. For, if we have an English word from which a word of this kind might be formed, as *declaratory*, *defamatory*, &c.; the accent will generally be found to be on the same syllable as in *declare*, *defame*, &c.; but, if we have no such corresponding English word, and the word of this termination comes from the Latin, as *promontory*, *desultory*, &c. the word then takes the secondary accent we give the Latin words *promontôrium*, *desultôrius*, &c. Now, though our English verb to *invent* comes from the same parent *invenio* as *inventory*, it is in no different a sense as to have no claim to the parentage. As, therefore, *inventarium* is the latter Latin word from which this word is derived, and as this has the secondary accent on the first syllable in our pronunciation of Latin, so *inventory* must have the principal accent on the same syllable in English.—See ACADEMIC, INCOMPARABLE, &c. Dr. Johnson, indeed, furnishes us with an authority from Shakspeare, against himself:

"I found,

"Forsooth, an *inventory* thus importing,

"The several parcels of his plate." *W.*

IRREDUCIBLE, ɪ-rè-dú'-sè-bl. *a.* Not to be brought or reduced. *Boyle.*

IRREFRAGABILITY, ɪ-rèf-frá-gá-bí-l'-è-tè. *n. s.* Strength of argument not to be refuted.

IRREFRAGABLE, ɪ-rèf-frá-gá-bl. or ɪ-rè-frág'-á-bl. [ɪ-rèf-frá-gá-bl, Jones and Todd.] *a.* [irrefragabilis, Lat.] Not to be confuted; superior to argumental opposition. *Bp. Hall.*

✂ If we might judge by the uniformity we find in our dictionaries, there would be no great difficulty in settling the accentuation of this word. Dr. Johnson, Dr. Ash, Dr. Kenrick, Bailey, Entick, W. Johnston, Perry, Barclay, and Buchanan, place the accent on the third syllable; Mr. Scott either on the second or third, with a preference to the latter; and Mr. Sheridan, alone, places it exclusively on the second. But, notwithstanding Mr. Sheridan's accentuation stands single, I am much mistaken if it has not only the best usage on its side, but the clearest analogy to support it. It were, indeed, to be wished, for the sake of harmony, that, like the Greeks and Romans, we had no accent higher than the antepenultimate; but language is the vox populi. Our accent, in a thousand instances, transgresses these classic bounds; and who shall confine it? In compounds of our own, with the utmost propriety, we place the accent on the fourth syllable from the last, as in *wearisomeness, serviceableness, &c.* 501; and a probable reason is given, under the word *academy*, why we accent so many words from the Latin in the same manner: but, be the reason what it will, certain it is that this custom has prevailed. This prevalence of custom is sufficiently exemplified in the positive of the word in question; *refragable* is accented by Johnson, Ash, and Bailey, on the first syllable, and would probably have been accented in the same manner by the rest, if they had inserted the word. Buchanan and Barclay, indeed, have the word, and accent it on the second; but their authority is greatly outweighed by the three others. Convinced, therefore, that pronouncing this word with the accent on the second syllable is following that path which the best usage has pointed out, I do not hesitate to dissent from so many authorities, especially when I find the best of these authorities inconsistent; for, if we are to place the accent on the first syllable of *refragable*, why we should remove the accent in *irrefragable* I cannot conceive.—See *ACADEMY* and *DISPUTABLE*. *W.*

IRREFRAGABLY, ɪ-rèf-frá-gá-blè. *ad.* With force above confutation. *Bp. Hall.*

IRREFUTABLE, ɪ-rè-fú-tá-bl. [ɪ-rèf-fú-tá-bl Jones.] *a.* [irrefutabilis, Lat.] Not to be overthrown by argument. *Bp. Hall.*

✂ All our dictionaries place the accent on the third syllable of this word; nor do I mean to affront such respectable authority by placing it on the second, as in *irrefragable*, though there is the same reason for both. Let it not be pleaded, that we have the verb *refute* in favour of the first pronunciation: this has not the least influence on the words *indisputable, irrevocable, incomparable, &c.* The reason why *corruptible* and *refractory* ought not to have the accent on the first syllable arises from the difficulty of pronouncing the uncombining consonants *pt* and *ct* in syllables not under the

stress.—See *Principles*, No. 517; also the words **ACCEPTABLE** and **REFRACTORY**. *W.*

IRREPARABLE §, ïr-rêp'-pâ-râ-bl. *a.* [irreparabilis, Lat.] Not to be recovered; not to be repaired. *Shakespeare*.

✠ This word and its simple *reparable* come from the Latin *reparabilis* and *irreparabilis*, and are pronounced with the accent on the preanteponultimate syllable, according to the analogy of words anglicised from the Latin, by dropping a syllable; which is, to place the accent on that syllable which had a secondary stress in our own English pronunciation of the Latin words.—See **ACADEMY** and **INCOMPARABLE**. *W.*

IRREPARABLY, ïr-rêp'-pâ-râ-blê. *ad.* Without recovery; without amends. *Boyle*.

JA'NTY*, jắn'-ẻ-tẻ. *a.* [from *gentil*, Fr. or the Teut. *gent*.] Showy; fluttering; finical. *Hobbes.*

✂ It is highly probable, that, when this word was first adopted, it was pronounced as close to the French *gentil* as possible; but, as we have no letter in our language equivalent to the French soft *g*, and as the nasal vowel *en*, when not followed by hard *g*, *c*, or *k*, is not to be pronounced by a mere English speaker, (see **EXCORS**), it is no wonder that the word was anglicised in its sound, as well as in its orthography. Mr. Sheridan has preserved the French sound of the vowel in this word and its compound *jauntiness*, as if written *jaunty* and *jauntiness*; but Dr. Kenrick, Mr. Scott, and Mr. Perry, give the *a* the Italian sound, as heard in *ant*, *father*, &c. and this, I imagine, it ought to have. 214. *W.*
